DOCTORAL DEGREE REGULATIONS

Wageningen University

December 2020
# Table of contents

**General provisions**
- Article 1  Definitions and general provisions  
- Article 2  Introductory provisions  

**The PhD candidate**
- Article 3  Qualifications for the doctorate  

**The promotor and co-promotor**
- Article 4  Qualifications and tasks of the promotor  
- Article 5  Qualifications and tasks of the co-promotor  

**The thesis committee**
- Article 6  Composition and operation of the thesis committee  

**Application for the PhD defence and appointment of the promotor**
- Article 7  Application for the PhD defence  
- Article 8  Appointment of promotor and co-promotor  

**Evaluation of the PhD thesis and the propositions**
- Article 9  Evaluation by the promotor  
- Article 10  Evaluation of the propositions by the Academic Board  
- Article 11  Evaluation of the PhD thesis by the opponents  

**The thesis and the propositions**
- Article 12  Contents of the thesis and the propositions  
- Article 13  Structure and design of the thesis  
- Article 14  Language of the thesis and the propositions  
- Article 15  Printing/reproduction and distribution of the thesis  

**The public defence of the thesis**
- Article 16  The thesis defence ceremony  
- Article 17  Conferring the doctorate and the degree certificate  

**The designation cum laude**
- Article 18  The designation *cum laude*  

**Settling disputes**
- Article 19  Settling disputes  
- Article 20  Complaint handling procedure  
- Article 21  Objection procedure  
- Article 22  Objection procedure regarding Article 4.1.c.  

**Honorary doctorate**
- Article 23  Honorary doctorate  

**Final provisions**
- Article 24  Final provisions  

**Appendices:**

| Appendix 1 | Learning targets for the PhD degree (doctorate) | 24 |
| Appendix 2 | Language requirements | 25 |
| Appendix 3 | Application letter for the public defence | 26 |
| Appendix 4 | Design, format, reproduction and distribution of the thesis | 28 |
| Appendix 5 | PhD candidate’s authorship statement | 36 |
| Appendix 6 | Thesis evaluation form with rubric | 37 |
| Appendix 7 | Protocol for the thesis defence ceremony | 44 |
| **Addendum appendix 7** | Deviations from the doctoral degree regulations in view of measures due to the COVID-19 pandemic | 48 |
| Appendix 8 | Regulations for conferring a joint, double or dual doctorate | 49 |
| Appendix 9 | Procedure and format request ius promovendi for others than associate professors 1 in Tenure Track | 57 |
General provisions

This document contains the English translation of the Dutch version of the Doctoral Degree Regulations. In case of discrepancies between the English translation and the Dutch text, the Dutch text prevails.

Article 1 Definitions and general provisions

1.1 Definitions

As used in these regulations, the following terms are defined below:
- Regulations: these doctoral degree regulations, including the corresponding appendices;

The other terms appearing in these regulations have the same meaning as those same terms from the Act.

1.2

When these regulations refer to a promotor or co-promotor, if reference is made to more than one promotor or co-promotor, this should be read as: promotors or co-promotors.

1.3

For purposes of clarity and simplicity, the feminine form (she, her) is used in these regulations. Of course, these regulations apply equally to both men and women.

Article 2 Introductory provisions

2.1.1

At Wageningen University, the doctorate can be conferred based on the PhD thesis.

2.1.2

The Academic Board confers the doctorate subject to the provisions in the Act and in these regulations.

2.2.1

At Wageningen University, a joint doctorate can be conferred based on the PhD thesis.

2.2.2

The Academic Board confers the joint doctorate together with one or more bodies authorised to confer the doctorate, the latter being linked to one or more partner institutes, on the basis of statutory provisions, these regulations and agreements made with the partner institute(s).

2.2.3

For a joint doctorate, prior written permission must be received from the Academic Board for the PhD programme.
2.2.4
Appendix 8 of these regulations contains additional rules on the joint doctorate.

2.3
The Academic Board enacts the regulations concerning the conferral of a doctorate after acquiring approval from the Executive Board.
The PhD candidate

Article 3 Qualifications for the doctorate

3.1 To qualify for the doctorate:
   a. based on the provisions in Article 7.10a, first, second or third clause of the Act, the candidate must have earned the degree of Master at an institute of academic education which is recognised by the Academic Board;
   b. as proof of her ability to perform as an independent practitioner of science, the candidate must have written a PhD thesis or created a technological design; and
   c. must have written at least six and no more than eight propositions; and
   d. must have satisfied the other requirements in these regulations.

3.2 In exceptional cases, the Academic Board can grant a doctorate to individuals who have satisfied the provisions in the first clause under b, c and d, but have not satisfied the provision in that clause under a.

3.3 The PhD candidate must have demonstrable proficiency in the language in which the thesis is written at the level established by the Academic Board as described in Appendix 2.
The promotor and co-promotor

Article 4 Qualifications and tasks of the promotor

4.1 Qualified to be appointed as a promotor by the Academic Board are:
   a. a professor at Wageningen University (with the exception of an honorary professor) or at another accredited university;
   b. an associate professor 1 in Tenure Track at Wageningen University;
   c. an employee of Wageningen University with the degree of Doctor or Doctor of Philosophy, who is in the opinion of the Academic Board, duly qualified to act as promotor. The Academic Board will decide on this matter at the request of the employee and in accordance with the criteria and procedure described in appendix 9.

4.2 An honourably discharged professor will retain her right to act as a promotor for candidates for whom she was already appointed as the intended promotor for five years after her discharge. The same does not apply to persons to be appointed as a promotor on the basis of Article 4.1.b and 4.1.c.

4.3 If the promotor to be appointed is not, and was not recently (as meant in Article 4.2), an employee of Wageningen University, the Academic Board will also appoint a promotor who is an employee of Wageningen University.

4.4 The Academic Board will appoint a minimum of one and a maximum of three promotors. In exceptional cases, appointment of four promotors is possible after a motivated written request of the promotor. In total, no more than four promotors will be appointed.

With due observance of Article 5.1, the Academic Board will appoint at least two and at most three promotors / co-promotors. In exceptional situations, the Academic Board can appoint four promotors / co-promotors after a motivated written request of the promotor. Appointment of more than four promotors / co-promotors is not possible. In very exceptional situations, the Academic Board may decide to appoint only one promotor and to refrain from appointing a second (co)promotor.

4.5 Individuals who have a family relationship with the PhD candidate, or have a relationship with the PhD candidate that might impair their objectivity, do not qualify for the position of promotor.

4.6 The promotor has the task of supervising the PhD candidate and is responsible for the supervision. She ensures that the thesis satisfies the requirements pursuant to these regulations.
Article 5 Qualifications and tasks of the co-promotor

5.1 The Academic Board may be requested by the promotor to appoint a maximum of two co-promotors. In exceptional situations, the Academic Board can appoint three co-promotors after a motivated written request of the promotor. Appointment of more than three co-promotors is not possible.

With due observance of Article 5.1, the Academic Board will appoint at least two and at most three promotors / co-promotors. In exceptional situations, the Academic Board can appoint four promotors / co-promotors after a motivated written request of the promotor. Appointment of more than four promotors / co-promotors is not possible.

5.2 The co-promotor is employed as a member of scientific staff, not necessarily at Wageningen University, and has earned a doctorate at an accredited university.

5.3 Individuals who have a family relationship with the PhD candidate, or have a relationship with the PhD candidate that might impair their objectivity, do not qualify for the position of co-promotor.

5.4 The co-promotor aids the promotor with the supervision of the PhD candidate. She determines whether the PhD thesis satisfies the requirements pursuant to these regulations and advises the promotor in this matter.
The thesis committee

Article 6  Composition and operation of the thesis committee

6.1
The Academic Board appoints a thesis committee for every PhD candidate.

6.2
The composition of the thesis committee is as follows:

a. as chairperson, the rector magnificus in her capacity as chairperson of the Academic Board, or her deputy;

b. the appointed promotor(s) and co-promotor(s), including at least one promotor who is (or recently was, as meant in Article 4.2) employed at Wageningen University;

c. four opponents, as further described in Article 6.3, of whom at least one is (or recently was, as meant in Article 4.2) employed by Wageningen University and has the ius promovendi as described in Article 4.

6.3
Professors or individuals who have earned doctorates can be appointed as opponents after the Academic Board has evaluated these individuals and determined that they are sufficiently qualified to be a member of the thesis committee.

Opponents must not be affiliated with or employed by the chair group of the PhD candidate or the chair group of one of the promotors or co-promotors. They may not have a family relationship with the PhD candidate or a relationship with her that might impair their independent judgement. They may not be a co-author in any of the thesis chapters.

6.4
The chairperson cannot vote.

The members referred to under clause 2 sub b jointly have a single vote, the other members as referred to in clause 2 sub c have one vote per person. The thesis committee makes decisions based on a simple majority of votes, unless stated otherwise in these regulations. The members can also submit their evaluation and their vote in writing to the chairperson. In any case, the chairperson calls a meeting if the required majority is not achieved by written ballot.
Application for the PhD defence and appointment of the promotor

Article 7  Application for the PhD defence

7.1
At least six months in advance of the desired date of the PhD defence, the PhD candidate applies to the Academic Board by submitting the application form (Appendix 3) to the PhD Office; the application must include all the information referred to on the application form.

7.2
The PhD candidate ensures that at the time of application she meets the education requirements referred to in Article 3 of these regulations.

7.3
On the application form, the PhD candidate lists the name(s) of the proposed promotor(s), their teaching and research remit, university affiliation and work address, along with the same information for the proposed co-promotor(s). The application form is signed by the (first) proposed promotor.

Article 8  Appointment of promotor and co-promotor

8.1
Immediately after a PhD study begins, the Academic Board appoints a promotor and possibly (at the request of the promotor(s)) a co-promotor. If needed, upon application for the PhD defence as referred to in Article 7, either the promotor or PhD candidate can request the appointment of a different promotor.

8.2
As a result of the request of the PhD candidate on the application form referred to in Article 7.1, the Academic Board appoints one or more promotors and possibly one or two co-promotors, if this has not yet occurred as referred to in Article 8.1.

8.3
Preceding the appointment, the Academic Board can provide a hearing to the PhD candidate, the proposed promotor(s) and co-promotor(s).

8.4
Both the PhD candidate and the appointed (co-)promotor must accept the appointment. By accepting her appointment, the (co-)promotor accepts the applicability of these regulations.
Evaluation of the PhD thesis and the propositions

**Article 9 Evaluation by the promotor**

9.1 The PhD candidate submits the PhD thesis and the propositions to the promotor for her evaluation.

9.2 In her evaluation of the PhD thesis and the propositions, the promotor takes the recommendation of the co-promotor into account.

9.3 The evaluation of the PhD thesis takes place by reviewing it in accordance with the requirements in these regulations, especially regarding the requirements in Articles 12 through 14 and 18, as well as the attainment targets established by the Academic Board as set down in Appendix 1.

9.4 The evaluation of the propositions takes place by reviewing them according to the requirements in Articles 12.3, 14.1 and 14.3, and according to general principles of morality and decency.

9.5 If the promotor determines that the PhD thesis and the propositions have satisfied the requirements, she approves the thesis and the propositions.

9.6 The promotor (or primary promotor if there is more than one) informs the Academic Board and the PhD candidate about this approval. This approval is not a final decision, but a recommendation to the Academic Board.

9.7 The Academic Board, taking account of the approval of the thesis and the propositions by the promotor, decides to appoint the thesis committee.

9.8 The PhD candidate has the right to respond to the decision as referred to in Article 11.5 and/or to amend the thesis for the purpose of resubmission. The PhD candidate submits the response and/or the amended PhD thesis to the promotor. If the promotor judges the amended thesis and/or the response defendable, the promotor will resubmit the amended thesis and/or the response.
Article 10 Evaluation of the propositions by the Academic Board

10.1 After being approved by the promotor, the propositions are submitted to the Academic Board for evaluation.

10.2 The Academic Board decides whether the propositions meet the requirements set in Articles 12.3 and 14.3.

Article 11 Evaluation of the PhD thesis by the opponents

11.1 After being approved by the promotor, the thesis is submitted to the opponents, who have been appointed for this purpose.

11.2 Within six weeks after receiving the thesis as approved by the promotor, the opponents decide whether or not the thesis has provided sufficient proof of competency in the independent practice of science to allow the PhD candidate to publicly defend her thesis. A positive decision requires a positive evaluation of all opponents.

11.3 The decision referred to in Article 11.2 is based on a review of the thesis with respect to the attainment targets formulated by the Academic Board, which have been listed in Appendix 1 and in Articles 12.1, 12.2 and 18 (cum laude).

11.4 On behalf of the thesis committee, the Dean of Research will inform the candidate and the promotor of the decision of the thesis committee in (digital) writing. If the thesis committee has decided that the PhD candidate is not allowed to defend her thesis, the reasons for this decision will be explained.

11.5 In case the thesis committee judges the thesis to be not defendable, the PhD candidate has the right to improve the thesis and/or to write a response only once. If the promotor determines that the thesis and/or the response have satisfied the requirements, the promotor will resubmit the amended thesis and/or the response. If the thesis committee maintains its judgement that the thesis is not defendable, the PhD candidate can restart the application procedure six months after the final decision.
The thesis and the propositions

Article 12  Contents of the thesis and the propositions

12.1
The thesis can be:
  a. a scientific treatment concerning a specific topic; or
  b. a number of distinct scientific treatments which already may have been
     published (partially or entirely), if they display sufficient coherence with
     respect to a specific topic; this coherence is to be demonstrated by the
     inclusion of a general introduction and general discussion; or
  c. a technological design, comprised of a drawing created with the help of
     appropriate theoretical knowledge and methodologies from the relevant field,
     accompanied by a scientific explanation and documentation.

12.2
The thesis is intended as proof of the competency of the PhD candidate to
conduct independent scientific research.

12.3
At least six and no more than eight propositions are added to the thesis. Two of
the propositions concern the topic of the thesis or the technological design, two
to four propositions concern a different scientific field or science in general and
two propositions concern a socially relevant topic. Propositions are concisely
worded positions taken by the PhD candidate that are formulated in such a way
that they can be debated at a scientific level and consist of one sentence.

12.4
A distinct scientific treatment, as referred to in Article 12.1 under b, which has
been written by the PhD candidate in cooperation with others, can be part of the
thesis only if she has provided a significant contribution and if the portion for
which she is primarily responsible is clearly indicated in the thesis.

12.5
The thesis can be written by one individual, or by two or three individuals
together. The individuals who have written a thesis together must satisfy the
following conditions:
  a. all authors are PhD candidates, each of whom satisfies the provisions and
     procedures in these regulations;
  b. the PhD candidates have at least one promotor in common;
  c. in the thesis, the portions for which each PhD candidate is primarily
     responsible are clearly indicated;
  d. each PhD candidate adds the prescribed number of her own propositions to
     the thesis;
  e. all PhD candidates must defend their thesis on the same day at Wageningen
     University.
Article 13  Structure and design of the thesis

13.1 The structure and design of the thesis must satisfy the corresponding guidelines established by the Academic Board, which are included in these regulations as Appendix 4.

13.2 It is not allowed to include advertising or logos in the thesis or on the cover. If a thesis is the result of a joint PhD programme and if the partner university requires so, logos of both universities may be presented on the cover and/or first title page.

13.3 If the PhD research has been made possible in part by support, financial or otherwise, from outside the university, this must be reported in the thesis according to the guidelines referred to in Article 13.1.

13.4 Sections which fall beyond the scope of the scientific treatment in the strictest sense can only be added to the thesis with permission from the Academic Board. Statements regarding religion or politics are not allowed, other than those related to acknowledgement of the support the PhD candidate has received.

Article 14  Language of the thesis and the propositions

14.1 The thesis is written in English. Upon request from the PhD candidate, the Academic Board can give her permission to write the thesis in Dutch.

14.2 The thesis contains a summary in English. One or two summaries in other languages are allowed. A thesis written in Dutch, contains a Dutch summary and an English summary that also provides a translation of the thesis title in English.

14.3 The propositions are formulated in the same language as that in which the thesis is written.

Article 15  Printing/reproduction and distribution of the thesis

15.1 Before the thesis is printed or reproduced in any other fashion:
   a. the thesis committee must have decided that the PhD candidate can be allowed to defend her thesis;
   b. the cover, the four title pages and the page opposite the end leaf must be approved by the Academic Board. To this end, the PhD candidate must submit copies of these pages for approval to the PhD Office;
   c. the printer’s proof of the thesis and the propositions must be approved in writing by the promotor, where the promotor takes the standards in or pursuant to these regulations into account.
15.2
In the guidelines that are included in these regulations as Appendix 4, the Academic Board determines the following:

a. the number of copies of the thesis that, preceding the public defence, must be provided to the Academic Board.

b. the number of copies of the thesis that the PhD candidate must supply at cost to the Wageningen University library, in consultation with the Executive Board.

c. the way in which an electronic version of the thesis must be provided.
The public defence of the thesis

Article 16 The thesis defence ceremony

16.1 The defence of the thesis takes place in public in the presence of the thesis committee.

16.2 The public defence is chaired by the rector magnificus as chairperson of the Academic Board, or her replacement.

16.3 The time and place of the public defence are determined by the Academic Board following consultation with the PhD candidate and promotor. The PhD candidate must submit a request for a time and place well in advance.

16.4 The Academic Board establishes the protocol of the public defence. The standard protocol is included in these regulations as Appendix 7.

16.5 The PhD candidate defends the thesis and the propositions for a period of 45 minutes; during this defence, she is opposed by the thesis committee and all other individuals who have been granted permission by the Academic Board. A request for permission to oppose the PhD candidate during the defence must be submitted to the Academic Board at least one week before the date of the public defence.

16.6 The public defence is conducted in English unless the PhD candidate has submitted a written request to conduct the defence in Dutch and all members of the thesis committee are able to discuss in Dutch.

Article 17 Conferring the doctorate and the degree certificate

17.1 During a private meeting that takes place immediately following the thesis defence, the thesis committee, on behalf of the Academic Board, decides whether or not to confer the doctorate.

17.2 Following the private meeting of the thesis committee, the chairperson reopens the public meeting and announces the decision of the thesis committee.

17.3 As proof of conferral of the doctorate, the PhD candidate receives a degree certificate. The degree certificate is signed on behalf of the Academic Board by the rector Magnificus or her replacement, the promotor(s), if relevant, the co-promotor(s) and by the PhD candidate.
17.4
If a decision has been made to confer the doctorate *cum laude*, then this is listed on the degree certificate.
The designation *cum laude*

**Article 18** The designation *cum laude*

18.1 If the PhD candidate has shown exceptional competency in the independent practice of science, the Academic Board can confer the doctorate *cum laude* (with distinction).

18.2 If the evaluation of the thesis by the thesis committee gives reason to do so, the Academic Board immediately submits the thesis to two additional experts and requests them to make a recommendation about the proposal to confer the designation *cum laude* in an explanatory letter. The experts must be full professors, but not at Wageningen University. At least one of the experts must be affiliated with a university outside the Netherlands. With the request to the experts, a proposal from the promotor (as referred to in Article 18.3) or a letter from the promotor in support of the assessment by the thesis committee will be sent.

18.3 Concomitantly with submission of the thesis, the promotor can submit a written proposal to the Academic Board to confer the degree with the designation *cum laude*. This document must explain the reasons for the proposed designation and will be forwarded to all members of the thesis committee.

18.4 Only if at least one of the experts advised positively, the Academic Board informs the thesis committee about the submitted proposal and calls a closed meeting of the thesis committee immediately preceding the defence ceremony. During this meeting, the thesis committee discusses the possible designation *cum laude*.

18.5 The thesis committee makes a decision about the proposal to confer the designation *cum laude* on behalf of the Academic Board during the closed meeting referred to in Article 17.1. The proposal will be approved if no member of the committee votes against it or if no more than one member of the committee abstains from voting. If one of the two consulted experts has made a negative recommendation, the proposal can be accepted only if there is a unanimous decision of the committee.
Settling disputes

Article 19  Settling disputes

19.2 The regulations concerning the conferral of a doctorate do not apply to legal disputes.

Article 20  Complaint handling procedure

20.1 An interested party can submit a request for mediation or complaint handling to the Academic Board in case of a dispute that concerns the behaviours or decisions of promotors, co-promotors, the Academic Board itself, or individuals who are acting on behalf of the Academic Board. Mediation does not suspend the term referred to in Article 21.1. In consultation with the party submitting the request, the chairperson of the Academic Board provides mediation or complaint handling in accordance with Chapter 9 of the General Administrative Law Act.

Article 21  Objection procedure

21.1 An interested party can object to decisions made by or on behalf of the Academic Board within six weeks after she is informed of the decision; she does this by submitting a notice of objection in an explanatory letter to the Academic Board. In case of decisions mentioned in Article 4.1.c, the objection procedure described in Article 22 applies.

21.2 After receiving a notice of objection, the Academic Board appoints an advisory committee.

21.3 The advisory committee comprises two members from the Academic Board and a chairperson who is not a member of and is not responsible to the Academic Board. The members of the advisory committee have not been involved in the PhD procedure that is the subject of the decision.

21.4 The advisory committee acts in accordance with the provisions in Article 7.13 of the General Administrative Law Act. The advisory committee can provide hearings to the parties involved and is authorised to obtain all information that is necessary for the adequate performance of its task.

21.5 The advisory committee makes a written recommendation to the Academic Board. The recommendation includes a report of the hearings.
21.6
Within 12 weeks after receiving the notice of objection, the Academic Board makes its decision about the objection, which it reports in an explanatory letter sent to the party who submitted the notice of objection and the other parties involved in the objection procedure.

21.7
If the decision on the objection deviates from the recommendation made by the advisory committee, the letter about the decision explains the reasons for this deviation, and the advisory committee recommendation is included.

21.8
Within six weeks after receiving the decision referred to in Article 21.6, an interested party can appeal to the competent Dutch court against this decision.

Article 22  Objection procedure regarding Article 4.1.c.

22.1
An interested party can object to decisions made by or in name of the Academic Board, as mentioned in Article 4.1.c. within six weeks after the decision has been made known to her, by lodging a motivated notice of objection to the Academic Board.

22.2
The “Regulation governing Wageningen University Advisory Committee on Appeals and Objections” applies to this objection procedure. The aforementioned Advisory Committee will advise the Academic Board on an objection.
Honorary doctorate

Article 23  Honorary doctorate

23.1
Upon nomination by the Executive Board, the Academic Board is authorised to award the degree *doctor honoris causa* (honorary doctorate) to an individual in recognition of her outstanding accomplishments. This doctorate is conferred by and in the presence of the Academic Board in a manner which is determined by this Board.

23.2
The other provisions in these regulations do not apply to the conferral of an honorary doctorate.
Final provisions

Article 24 Final provisions

In all cases not covered by these regulations, the Academic Board will make a decision on the matter.

These regulations were determined by the Academic Board of Wageningen University on 13 November 2019 and approved by the Executive Board of Wageningen University on 18 November 2019.
Appendices:

1. Learning targets of the doctorate
2. Language requirements
3. Application form for the PhD thesis defence
4. Guidelines for structure, design and distribution of the thesis
5. PhD candidate’s authorship statement
6. Thesis evaluation form with rubric
7. Protocol for the thesis defence ceremony
8. Regulations for conferring a joint, double or dual doctorate
9. Procedure and format request ius promovendi for others than associate professors 1 in Tenure Track
Appendix 1 Learning targets for the PhD degree (doctorate)

The recipient of the doctorate is capable of:

1. functioning as an independent practitioner of science who is able to:
   a. formulate scientific questions, either based on social issues or scientific progress;
   b. conduct original scientific research;
   c. publish articles in peer-reviewed scientific journals, publish books with scientific publishers or make a technical design;
2. integrating her research in, or placing it within the framework of, the own scientific discipline and against the background of a broader scientific area;
3. placing the research aims and research results in a societal context;
4. postulating concisely worded propositions in scientific and societal areas, formulated in such a way that they are subject to opposition and defence.
Appendix 2 Language requirements

In order to be admitted to the PhD programme, the PhD candidate must demonstrate proficiency in the English language, as well as the Dutch language if the thesis is written in Dutch, at the level established by the Academic Board.

Proficiency in Dutch is defined as having passed the final exam in Dutch for pre-university education in the Netherlands, as shown by possession of a VWO diploma or comparable certificate.

If the PhD-candidate is not Dutch, from a non-Anglophone country and does not have completed her higher education with English as the language of instruction, the candidate has to submit an internationally recognised Certificate of Proficiency in the English Language. This must be done prior to the start of the PhD-project and before the PhD registration at Wageningen University. The reason is that this is needed to be registered in the Wageningen University PhD registration system.

The recognised certificates and the minimum required scores are:
- TOEFL internet-based 90, with minimum sub-score 20 for speaking
- IELTS (academic version) 6.5, with minimum sub-score 6.0 for speaking
- Cambridge Certificate of Advanced English (CAE) with minimum grade C
- Cambridge Certificate of Proficiency in English (CPE) any grade
- RATEr: This is a local test that can only be done at Wageningen University. To meet the entry requirements the following scores must be obtained*:

<table>
<thead>
<tr>
<th>Task</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading &amp; Vocabulary</td>
<td>23</td>
</tr>
<tr>
<td>Writing</td>
<td>47</td>
</tr>
<tr>
<td>Listening</td>
<td>23</td>
</tr>
<tr>
<td>Speaking</td>
<td>62</td>
</tr>
</tbody>
</table>

* Candidate must pass all elements to get an overall pass

1. In a situation where the promotor has reason to allow a PhD candidate, who has not yet met the requirements, to come to Wageningen, she must write a letter to motivate their reasons. This letter must accompany the PhD registration documents.

2. In this situation the candidate has three months to meet the proficiency requirements. To facilitate this, "Wageningen In'to Languages“ offers an intensive writing course which ends with a RATEr test (See their pages on courses offered by in'to Languages for PhD Candidates for more information.).

3. Test results may not be older than 24 months at the moment of application.
Appendix 3 Application letter for the public defence

Note: the application letter below is an example. Do not send this letter. Instead, please download the form from Promis.

Application letter for the public defence of a PhD thesis at Wageningen University

This letter has to be signed by the PhD candidate and the promotor. It is allowed to e-mail a signed scan of this letter to: promovendi@wur.nl

To the Rector Magnificus of Wageningen University
c/o PhD office (bode 15)
Att. of ms. J. Kuijper / ms. J. Sloot
Droevendaalsesteeg 2
6708 PB Wageningen

Dear Rector Magnificus,

Hereby I request that my PhD thesis and propositions be judged for public defence according to the doctoral degree regulations of Wageningen University.

The preliminary title of my thesis is: .............................................

I declare that this work is original and has not been used to confer a doctorate elsewhere. In addition, I declare to meet all the criteria of article 3.1a, 3.2 and 3.3 of the doctoral degree regulations of Wageningen University, and that I am fully admitted to the PhD Programme of Wageningen University by means of a letter of the Dean of Research.

My personal data are shown below:

WUR-account:
First name(s):
Family name:
Home address:

Phone mobile:
Phone:
WUR e-mail:
Private e-mail
Date of birth:
Place of birth:

Field of study: ............................................
Short (2 sentences) summary of my thesis: .......................

Promotor

Co-promotor

If a (co-)promotor is not a WUR staff member, please mention function/chair and affiliation with full postal and email address

This is a joint/double/dual degree: yes / no (if so, please also fill in the second page of this form)

With kind regards,

Signature PhD candidate, date                  Signature (first) promotor, date
Only fill in the questions below when this will be a joint/double/dual degree

Approval by the Dean of Research
Has this joint/double/dual degree been approved by the Dean of Research, either as part of a larger programme or as an individual degree?
Yes / no
If no, please, seek approval by the Dean of Research first, with help from your graduate school.
See also appendix 8 of the Doctoral Degree Regulations, to be found on http://www.wur.nl/en/Education-Programmes/PhD-Programme/Regulations.htm

Full name of partner university : ...........
For example: not ‘SLU’ or ‘Uppsala’, but ‘Swedish University of Agricultural Sciences’.

Is this joint/double/dual degree part of a larger programme with more PhD candidates?
Yes / no
If yes, name of programme : ...........

Place of public defence
In the case of a joint/double/dual degree, the public defence may take place a) in Wageningen or b) at the partner university. Each university will issue a diploma.
a) If the public defence takes place in Wageningen, the partner institution may – if desired – organise later an own public defence or other ceremony.
b) If the public defence takes place at the partner university and subsequently also a ceremony is desired in Wageningen, that ceremony will not be an official public defence in the Aula but a ceremony organised by the supervisors.

The public defence will take place in : ...........

Will there be a second public defence or other ceremony?
Yes / no
If yes, place of second ceremony : ...........
Appendix 4 Design, format, reproduction and distribution of the thesis

Appendices 4a through 4d show how the thesis should appear regarding its cover (4a), required title pages (4b), acknowledgements of financial support (4c) and the propositions (4d). Any deviation from these examples requires prior permission from the Academic Board.

Two weeks before the public defence, the PhD candidate submits 15 copies of the thesis to the PhD Office, and one (1) copy, a PDF file (which must include the thesis cover and the propositions) and an abstract in Word format to the Library.
Appendix 4a Cover
Logos on the cover are not allowed, except in the case of a joint degree, see appendix 8.
Appendix 4b - required title pages

First title page

The *Phytophthora infestans* avirulence gene *X5yz* and its potato counterpart *A6*

Piet A. Ardappel

(This is a fictional example)
Second title page
Professors with personal or special chairs must be explicitly indicated as such in the list of promotors. Their affiliation must also be listed. The list of co-promotors must state their positions and affiliations. The affiliation of WUR promotors and co-promotors consists of their basic organisational unit (chair group or business unit) plus Wageningen University & Research as main affiliation. The other members (the opponents) are listed with their main affiliation. Affiliations outside the Netherlands must also include the name of the country.

Thesis committee

Promotors
Prof. Dr F. Pietersen
Personal chair at the Laboratory of Phytopathology
Wageningen University & Research

Prof. Dr F. Swartjes
Professor of Phytopathology
Wageningen University & Research

Co-promotor
Dr P.A. Willis
Associate professor, Animal Nutrition Group
Wageningen University & Research

Other members
Prof. Dr W.J. Stekels, Wageningen University & Research
Dr P. de Groot, University of Amsterdam
Dr A. de Bruin, Keygene N.V., Wageningen
Dr P. van Oost, University of Aberdeen, UK

This research was conducted under the auspices of the Graduate School Experimental Plant Sciences

(This is a fictional example)
The *Phytophthora infestans* avirulence gene *X5yz* and its potato counterpart *A6*

Appendix 4c – acknowledgements of financial support (last inside page of thesis)

Logos are not allowed, except the FSC logo if the thesis is printed on FSC-certified paper. Acknowledgments of the cover designer and printing company are optional.

The research described in this thesis was financially supported by <name financier>.

Financial support from Wageningen University and <name financier> for printing this thesis is gratefully acknowledged.

Cover design by <name designer>

Printed by <name printing company> on FSC-certified paper <optional>

(This is a fictional example)
Appendix 4d – propositions (as a separate leaflet)

Propositions

1. The general assumption that the mesophyll conductance to carbon dioxide in leaves of green plants is infinite cannot be maintained. (this thesis)

2. The partitioning of excited electrons to photosystems I and II is unbalanced in plants suffering from severe drought stress. (this thesis)

3. Zinc biofortification of cereals through plant breeding is inefficient, especially in the case of wheat.

4. For the analysis of the crop physiological background of tuber size distribution in potato it is essential to analyse phenomena of tuber set and tuber bulking at the level of the individual plant.

5. Moral acceptance of techniques of genetic modification plays a much smaller role in the debate on genetically modified organisms than proponents of such techniques assume.

6. The current debate in literature on the question whether green plants are intelligent suggests that plants might have a greater ability to perceive signals from their environment and to learn from these signals than some scientists do.

Propositions belonging to the thesis, entitled

Why electrons get excited and how to cool them down: on the thermodynamics of photosynthesis in green plants

Paul Herbert Droef
Wageningen, 1 February 2017 (Date defence ceremony)
Appendix 5 PhD candidate’s authorship statement

Aim of the authorship statement
The authorship statement is sent with the thesis manuscript to the opponents to allow them to judge the candidate’s contribution to (chapters in) the thesis. A PhD study is a learning process, so the candidate is not supposed to have it done all by her/himself. The promotor may have come up with the research question, for example, or suggested text improvements. Perhaps for example a MSc student did an experiment under the candidate’s guidance.

The authorship statement should focus on the candidate’s own contribution
While it may be needed to mention what others did, in particular when the candidate is not the first author of a chapter, the statement should focus on the candidate’s own contribution. Therefore, the text is written in the first person. The text must be concise, maximum 1 page A4, about 500 words. If there are authorship statements on chapters that were already submitted or published as paper, these may be re-used in this authorship statement.
Items to address in the research chapters are usually: research question, methodology, research and data collection, data analysis, text and graphs, and the final discussion. For other chapters or for other types of research, the items to address may differ.

Example of an authorship statement

PhD candidate’s name: . . .
First promotor: . . .
Title of PhD thesis: . . .
Date of public defence: . . .

Chapter 1 General introduction. The general research question and its general scientific and social perspective were proposed by my promotor. I delineated the research question, described how it fits in the current scientific literature and described its potential social impact. I revised the text two times, after comments of my co-promotor.

Chapter 2 . . .

Chapter 3 Heat resistance of ice-cream. I contributed to defining the research question, proposed the methodology and the experimental design, carried out the experiments together with an MSc student whom I supervised, and did the data analysis together with the student and a statistician. The student wrote the first draft (therefore, I am second author) and revised it after the comments of myself (which were quite many) and the other co-authors.

Chapter 4 . . .

Chapter 5 . . .

Chapter 6 General discussion. I wrote the first draft of the text after just one discussion with my co-promotor on the subjects and arguments to be included. I revised the text once, after comments of my promotor and co-promotor.

Signature promotor for agreement
Appendix 6 Thesis evaluation form with rubric

Aim of a thesis evaluation with rubric

Quality standards for PhD theses differ worldwide, and so do evaluation procedures and grades such as cum laude (with distinction). Wageningen University provides the thesis committee and external experts with detailed information concerning the evaluation procedure and a rubric for the evaluation of a thesis. This information provides transparency of Wageningen University’s thesis requirements to PhD candidates and their (co-)promotors.

Thesis evaluation form as sent to the thesis committee

Dear members of the thesis committee,

Thank you for your willingness to evaluate this PhD thesis. Wageningen University PhD theses are evaluated on five criteria using a standard form and a rubric which is provided at the end of this document. The aim of using a rubric is to enhance homogeneity of assessments and the ability to discuss assessments with other examiners and the (co-)promotor(s) (main supervisors). Also, it clarifies the expectations for a thesis to PhD candidates. The standard evaluation form also has comment fields to elaborate on your evaluation for each of the five criteria. The use of these comment fields is highly recommended for providing additional feedback. In the rubric:
- each row represents one criterion, e.g. originality of the research;
- each column represents a level for the grading, e.g. ‘good’;
- each cell describes the level for that criterion.

Please start at the lowest mark in the rubric and test whether the PhD thesis is better described by the next higher level. Achievements at lower levels are implicit at higher levels and not again included in the criteria. You are kindly asked to describe in 25 – 100 words your evaluation of each of the five criteria.

It could be that the PhD thesis scores ‘unacceptable’ on one criterion and ‘good’ on another. An ‘unacceptable’ for one of the five criteria designates that the thesis is not defendable in which case it is important to provide detailed feedback to enable the candidate to develop a revised version.

Your thesis evaluation will be made available to the Dean of Research and is used to decide whether the PhD candidate can be allowed to defend the thesis. Moreover, the Dean will use your evaluation to decide whether the PhD thesis should be considered for a cum laude designation in which case two additional reviewers (external experts) will review the thesis. In addition, directly after the public defence of the thesis, the committee will discuss the quality of the thesis and the defence in a joint meeting chaired by the (deputy) Rector Magnificus and here your anonymized evaluation report will be used as starting point for the discussion. Your anonymized thesis evaluation report will only be disclosed to fellow committee members when the PhD thesis is considered for a cum laude.

The (co-)promotor(s) will receive your anonymised thesis evaluation report:
- in case the thesis is graded as ‘unacceptable’, to allow the candidate to improve the thesis. Your comments and reasons for your judgement are important as the candidate has the possibility to revise the thesis and/or provide a rebuttal;
- immediately after the defence, as feedback to the (co-)promotor(s) regarding the quality of this thesis and to clarify the expectations for possible next PhD theses under her/his supervision.

There is insufficient time for the candidate to make major revisions based on your comments in case he/she is allowed to defend the thesis. However, if you identify grammatical, formatting or other minor errors, your suggestions for correction of these errors will be forwarded to the (co-)promotor(s), who will then confer with the PhD candidate whether or not to incorporate your suggestions in the thesis.

**Requirements for the degree of doctor awarded by Wageningen University**

In order to be awarded the degree of doctor, the candidate must have demonstrated the capability of:

1. functioning as an independent practitioner of science who is able to:
   a. formulate scientific questions, either based on social issues or scientific progress;
   b. conduct original scientific research;
   c. publish articles in peer-reviewed scientific journals, publish books with scientific publishers or make a technical design;
2. integrating her/his research in, or placing it within the framework of, the own scientific discipline and against the background of a broader scientific area;
3. placing the research aims and research results in a societal context;
4. postulating concisely worded propositions in scientific and societal areas, formulated in such a way that they are subject to opposition and defence.
Your evaluation of the PhD thesis

Name of the PhD candidate : ..........................
Planned date of the public defence : ..........................
Title of the PhD thesis  : ..........................

Note: After the public defence your anonymised evaluation form will be provided to the promotor.

1. Originality of the research
Grade: unacceptable / acceptable / satisfactory / good / very good / excellent
Reason for evaluation (25-100 words):

2. Scientific quality of the research chapters
Grade: unacceptable / acceptable / satisfactory / good / very good / excellent
Reason for evaluation (25-100 words):

3. Reflection on the research as shown in the Introduction and General discussion
Grade: unacceptable / acceptable / satisfactory / good / very good / excellent
Reason for evaluation (25-100 words):

4. Quality of written presentation
Grade: unacceptable / acceptable / satisfactory / good / very good / excellent
Reason for evaluation (25-100 words):

5. Overall Assessment (based on the above evaluation categories 1 – 4)
Grade: unacceptable / acceptable / satisfactory / good / very good / excellent
Reason for evaluation (25-100 words):
Your conclusion (1) - should the candidate be allowed to defend the thesis?

The PhD candidate will only be allowed to defend the thesis if none of the above criteria are marked as ‘unacceptable’. In the case of a ‘unacceptable’ score, please provide your arguments for that qualification in the box below. The anonymized evaluation form will be forwarded to the candidate’s promotor who will request the candidate to improve the manuscript. The revised version of the manuscript, with a letter explaining the changes made, will be evaluated by the member(s) of the thesis committee that scored the thesis as ‘unacceptable’ on any of the five criteria. In case the changes to the thesis are substantial, the other members of the thesis committee will be informed about the changes but will not be asked to re-evaluate the thesis.

“I propose that the PhD candidate can defend the thesis:” yes / no

Note: this question must be answered!

Reasons in case you propose the candidate cannot defend the thesis (25-100 words):
Keep on separate page so that the form can be anonymised easily

Name of committee member  : ……………………………
Chair / Function / Affiliation : ……………………………
Date  : ……………………………

Please e-mail the completed form to: promovendi@wur.nl

<tr>
<th>Criteria</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Satisfactory</th>
<th>Good</th>
<th>Very good</th>
<th>Excellent</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Originality of the research*</td>
<td>Does not make a contribution, either because it is a copy, or nearly so, of work done before by others, or because the research question is trivial.</td>
<td>Makes a small and not very original contribution, uses a cookbook approach, is not really interesting but shows the ability to do research.</td>
<td>Makes a modest contribution by addressing a relevant, but small and traditional question that is interesting for those who work on the same subject.</td>
<td>Makes a substantial contribution by addressing a relevant question that is interesting for others within the field. Is a solid part of normal science but does not open up the field.</td>
<td>Makes an important contribution by solving an old problem in a new way, or by addressing a new and relevant question, however without completely exploring and solving that new question.</td>
<td>Makes an exciting, major contribution, either by solving an old problem in a brilliant, innovative way or by asking and answering a new and intriguing question.</td>
</tr>
<tr>
<td>2. Scientific quality of the research chapters*</td>
<td>Chapters lack the scientific quality to be publishable in any reputable journal or by any reputable book publisher.</td>
<td>Chapters lack clear cohesion and/or show variable quality. One or two chapters have the quality to be publishable in low-ranking journals or as part of a larger book, but will probably remain uncited.</td>
<td>Chapters have sufficient cohesion and quality to address the research question. Most chapters are publishable in low-ranking journals or by a low-ranking book publisher and may receive few citations.</td>
<td>Most chapters are published or likely to be published in reputable journals, and may become cited within the field. If a monograph, the thesis may be interesting for a reputable publisher.</td>
<td>All or most chapters are published or likely to be published in the upper range of journals in the field, likely to become well cited within the field. If a monograph, the thesis will certainly evoke interest from reputable publishers.</td>
<td>All or most chapters are published or likely to be published in top journals in the field, likely to become well cited within and outside the own field. If a monograph, top publishers will like to publish it.</td>
</tr>
<tr>
<td>3. Reflection on the research as shown in the ‘Introduction’ and ‘General discussion’</td>
<td>The thesis does not clearly describe what the candidate has done and why. Candidate cannot show how the results fit in the existing knowledge, or what the social impact is. Possible weaknesses in the research are not discussed.</td>
<td>The thesis describes in a simple way what the candidate has done, but not why. Trivial reflection on how results fit in the existing knowledge and what the social impact is.</td>
<td>The thesis describes adequately what the candidate has done, but hardly, or unclear, why this was done. Narrow view on how results fit in the existing knowledge and what the social impact is.</td>
<td>The thesis describes clearly what the candidate has done, but less clearly why this was done. Obvious correspondences and conflicts with existing knowledge are identified. Most obvious social impact is indicated.</td>
<td>The thesis describes clearly what the candidate has done and why. Most correspondences and conflicts with existing knowledge are identified. Most social impact is indicated.</td>
<td>The thesis shows clearly, compellingly and critically what the candidate has done and why. Results are critically confronted with existing knowledge. Possible social impact is addressed in full.</td>

<tbody>
<tr>
<td>4. Quality of the written presentation</td>
<td>Writing, figures and lay-out are so poor that it is hard to understand what the candidate wants to say. Reading is very difficult.</td>
<td>Writing, figures and lay-out are not always correct and clear, level of detail varies widely, but with effort the text is understandable. Reading is difficult.</td>
<td>Main structure of the thesis is adequate, but placement and structure of sections are often not logical.</td>
<td>Writing is correct and mostly clear, but text could be more concise. Figures and lay-out are mostly clear, with few flaws. Reading is laborious.</td>
<td>Main structure of the thesis is correct, but some sections are less well placed or less well structured.</td>
<td>Writing is clear and concise, figures and lay-out are functional and flawless. Reading is a joy.</td>
</tr>
<tr>
<td>5. Overall assessment</td>
<td>Based on the above categories the overall quality of the thesis is considered poor. In case one of the five criteria is marked as 'unacceptable' by any of the opponents/reviewers, the PhD candidate will not be allowed to defend the thesis without major revision.</td>
<td>Based on the above categories the overall quality of the thesis is considered acceptable. The PhD candidate will be allowed to defend the thesis.</td>
<td>Based on the above categories the overall quality of the thesis is considered satisfactory. The PhD candidate will be allowed to defend the thesis.</td>
<td>Based on the above categories the overall quality of the thesis is considered good. The PhD candidate will be allowed to defend the thesis.</td>
<td>Based on the above categories the overall quality of the thesis is considered very good. The PhD candidate will be allowed to defend the thesis.</td>
<td>Based on the above categories the overall quality of the thesis is considered excellent. The PhD thesis belongs to the top of the scientific field. This may be a reason for awarding the designation ‘cum laude’ (‘with distinction’).</td>
</tr>
</tbody>
</table>

\[1\] In case a thesis reports interdisciplinary or applied research, please consider the contribution to the interdisciplinary or applied field rather than to each of the underlying disciplines. In the case of a design, please consider the originality of the design and the contribution to technology. Consider the candidate’s technological competence, application of design methodologies, and analytical and integrative skills.

\[2\] If the research chapters are multi-authored, it is important to consider the candidate’s contribution to each chapter, in particular when s/he is not the first author. To this end, an authorship statement by the candidate has been added to the thesis manuscript. Also, it is good to check whether the research chapters show a level of written presentation similar to the Introduction and General discussion of the thesis. If the quality of the written text in the research chapters is much better, this may result in a higher grade for the criterion ‘research chapters’ but it indicates an important contribution of co-authors. Thus, a higher grade for the ‘research chapters’ in the thesis alone should perhaps not be reflected in the overall grade of the thesis.

\[3\] After the oral defence, the committee will be asked to comment on the quality of the defence. At that point the final decision whether or not to award a cum laude designation is made by anonymous voting.
Appendix 7 Protocol for the thesis defence ceremony

Location
Wageningen University Auditorium
Gen. Foulkesweg 1a, Wageningen

General aspects
The thesis defence ceremony has a long tradition. It is the pinnacle in the practice of science, where newly developed ideas and concepts are discussed and defended, in a public and preferably international setting, between early stage and established scientists. Wageningen University aims for the PhD defence to be a highly dignified ceremony where science is discussed at the highest level and has, therefore, established this protocol.

The PhD candidate can be accompanied by at most two paranymphs. These ceremonial assistants support the PhD candidate in practical matters, for example by reading one of the propositions on request.

Four opponents need to be present at the defence ceremony. Only in exceptional cases a public defence ceremony can take place with three opponents. If an opponent cannot attend, the promotor is responsible for finding a replacement. This must be another qualified scientist with a doctorate according to the requirements stated in article 6.3. One of the four opponents can question the candidate via a video connection on the condition that the opponent is not residing in the Netherlands. The PhD office must be notified in time in the latter case. Only in exceptional cases, and with the specific permission of the Dean of Research, a second opponent may question the candidate via a video connection.

The ceremony is recorded and is accessible to the public in real-time at https://weblectures.wur.nl/. A copy of the broadcast can be viewed and obtained via the same website. A video recording of the defence ceremony will be kept for three years and filed afterwards.

Wageningen University takes great care with recorded video material and complies with all legal requirements. At Wageningen University, Protection of Personal Data regulations, are in force, which is published on the website of Wageningen University.

Conventions
The focus of the ceremony is the practice of science. It is, therefore, inappropriate for the PhD candidate, paranymphs or members of the thesis committee to make any religious, political or nationalistic statements by means of words, gestures or in any other way, during and 30 minutes before the academic ceremony. Any other statements that do not show respect for the scientific and dignified character of the ceremony are also not permitted.

Terms of address
Rector Magnificus (or her substitute) Madame / Mister (Deputy) Rector / Chair Candidate Respected candidate

2 Normally the thesis defence ceremony is conducted in English and the titles and texts spoken by the Rector Magnificus and supervisor included in this appendix apply. See Article 16.6 for the rules regarding the language of defence. The titles and texts used in a defence ceremony that is conducted in Dutch, can be found in Annex 7 of the Dutch version of these doctoral degree regulations, "Promotiereglement Wageningen University".
Promotor: Highly esteemed promotor  
Co-promotor: Highly esteemed co-promotor  
Opponents: Highly esteemed opponent

**Dress Code**
During the PhD ceremony, the PhD candidate, paranymphs and the members of the thesis committee are expected to wear the following clothing:
- PhD candidate and paranymphs: formal clothing in subdued colours (ladies) and preferably white tie with black shoes and black socks (gentlemen)
- Thesis committee:
  - Full professors: gown and cap and formal clothing in subdued colours (ladies) or dark suit with black shoes and black socks (gentlemen)
  - Other members: preferably white tie or tenue the ville in subdued colours with black shoes and black socks (gentlemen) or formal clothing in subdued colours (ladies).

**Schedule**
- 30 minutes before the start of the academic session
  The thesis committee meets in the committee room at the Aula, where the Rector Magnificus explains the procedure, and opposition questions, propositions and time allocation are discussed. If an opponent will be present at the ceremony via a video connection, she/he will join this meeting via another video connection.
  PhD candidate, paranymphs and beadle meet in the small auditorium.
  The audience is seated in the main auditorium.

- 15 minutes before the start of the academic session
  The beadle strikes the floor one time with the mace and escorts the PhD candidate and the paranymphs to the podium in the main auditorium.
  The PhD candidate gives a brief presentation of the PhD research (max 14 min).
  The paranymphs are seated on the podium, in front at either side of the candidate.

- 2 minutes before the start of the academic session
  The beadle strikes the floor three times with the mace and escorts the thesis committee to the podium in the main auditorium in ceremonial procession led by the Beadle then the Rector Magnificus followed by the promotor(s) and co-promotor(s) and then the opponents in order of opposition.
  Thesis committee members take their seats on the podium or join via a video connection.
  The Rector Magnificus and the promotor/co-promotor(s) are seated at the table on the right-hand side of the podium (as seen from the auditorium). The first promotor is seated left from the Rector Magnificus, and the second promotor and/or co-promotor(s) on the right-hand side of the Rector.
  The other members of the thesis committee take their seats at the table on the left-hand side of the podium (as seen from the auditorium), in the order in which they will oppose the PhD candidate, with the first opponent seated closest to the public.
  The Beadle leaves the auditorium.
Start of the academic session
The Rector Magnificus opens the meeting by the strike of the gavel and begins the ceremony with the words:
"I hereby open this ceremony, convened by the Academic Board of Wageningen University, in which <name of PhD candidate> is offered the opportunity of defending a thesis, with propositions, entitled '<title of thesis>'. The defence will take place before a thesis committee appointed by the Academic Board as a prerequisite for conferring the degree of doctor. Good morning/afternoon ladies and gentlemen. I would like to welcome you all to this graduation. My name is <name>. I am professor of <name chair> and representing the Academic Board and the Rector Magnificus today."

The Rector Magnificus gives the floor to the first opponent but first introduces the opponent with the words:
"I call on the first examiner, <name and affiliations of the opponent>."
The Rector Magnificus introduces each subsequent member of the thesis committee in a similar manner.
The opponents ask their questions and discuss their issues with the PhD candidate during the time that is allocated to them, which is monitored by the Rector Magnificus.

- 45 minutes after the start of the academic session
The beadle enters the auditorium, walks onto the podium and strikes the floor one time with the mace before speaking the words out loud: “Hora est”. The Rector Magnificus ensures that any continuing discussion or argument is completed, including its defence, and adjourns the meeting with the words: “I adjourn the meeting; the thesis committee will now withdraw for consultation.”
Preceded by the Beadle, the committee leaves the auditorium in ceremonial procession and returns to the meeting room. If an opponent was present at the ceremony via a video connection, she/he will join these deliberations via another video connection.
The thesis committee decides whether to confer the degree of doctor whereafter the Rector Magnificus, promotor(s) and co-promotor(s) sign the diploma. The committee then discusses the quality of the thesis, using the previously sent thesis assessment forms. The Rector Magnificus provides an overview of the evaluations after which the promotor makes an initial proposal for the assessment of the quality of the dissertation. Then the Rector Magnificus asks the opponents if they agree with the assessment of the promotor and a discussion follows among the thesis committee members. After a decision has been made, about the assessment of the thesis and propositions, the Rector Magnificus asks the promotor to make an initial proposal for the assessment of the quality of the defense. Then the opponents are asked if they agree with this assessment followed by a discussion among the thesis committee members. In case the committee does not reach a unanimous decision regarding the quality of the thesis and propositions or the defense, the Rector Magnificus will register the lowest qualification as the final assessment. After the discussion and decision, the Rector Magnificus records the final assessments by the committee in the promotion book.

- 60 minutes after the start of the academic session
The thesis committee enters the auditorium in ceremonial procession, and all members take their places as before.
The Rector Magnificus reopens the meeting and announces the decision that the thesis committee has taken on behalf of the Academic Board with the following words: "I hereby re-open this meeting. The Academic Board of Wageningen University, represented by the Rector Magnificus and <number> committee members appointed by the Academic Board, having noted the content of a thesis, entitled '<title of the thesis>' with propositions, having heard the defence of that thesis, has decided to confer the degree of doctor on: <name of PhD candidate>, born in <city of birth> on <birthdate> and to grant to him/her all rights and privileges ensuing from that doctorate by law and custom."
(In case the degree is awarded cum laude, the following is added: "Moreover, due to the exceptional capability in the independent practice of science shown by the candidate, the designation 'cum laude' is attached to this degree.")
"The Academic Board assumes that you accept your duty as a scientist to execute your future research ethically and with due diligence according to the Netherlands Code of Conduct for Research Integrity. I now invite the promotor <name> to acquit him/herself of her/his duty."

The promotor invites the new doctor to sign the diploma with the following words: "You have heard the decision of the Academic Board of Wageningen University to confer on you, <name PhD candidate>, the degree of doctor. It is now my honour to present you with the degree, signed by the (deputy) Rector Magnificus, the promotor and the co-promotor(s), and sealed with the Great Seal of Wageningen University. I first invite you to sign the degree as well. With this signature, you declare to act according to the Netherlands Code of Conduct for Research Integrity in the future."

The Beadle allows the new doctor to sign the diploma whereafter it is handed to the promotor who will officially present the candidate with the diploma. The promotor will then continue the ceremony with the words: "Allow me, madam/mister (deputy) Rector Magnificus, to offer my congratulations and to add a personal address." The congratulations and personal address last no more than five minutes in total and are business-like and constructive in tone. The grade of the thesis and defence will be mentioned only in case of cum laude.

Thereafter the promotor gives the floor back to the Rector Magnificus with the words: "I hereby give the word back to the (deputy) Rector Magnificus", the Rector Magnificus congratulates the new doctor on behalf of the university, acknowledges the contributions of the members of the thesis committee, and thanks the audience for their presence before closing the meeting. The committee leaves the main auditorium in ceremonial procession, followed by the new doctor and the paranymphs.

After the close relatives have congratulated the new doctor, the promotor(s) and co-promotor(s) are the first to get the opportunity to offer their congratulations.
Addendum appendix 7 Deviations from the doctoral degree regulations in view of measures due to the COVID-19 pandemic

As a result of the, in March 2020, enforced international and national measures due to the COVID-19 pandemic, the thesis defence ceremony may deviate from the ceremony as set out in Appendix 7 of the doctoral degree regulations. If, in the opinion of the Academic Board, the current measures due to the COVID-19 pandemic give reason to do so, a “public defence” or “public meeting” as referred to in the doctoral degree regulations will not take place in the Wageningen University Auditorium, but online. An online defence will be recorded and broadcasted live and will remain accessible to the public online at https://weblectures.wur.nl/.

If the Academic Board decides that the public defence of a particular dissertation will take place online, this will have consequences for the application of at least the following articles and appendices of the doctoral degree regulations: articles 16.1, 16.2, 16.4, 16.5, 16.6 and 17.2, and appendices 3, 4 and 8.
Where in Appendix 7 reference is made to a “private meeting” or “closed meeting”, an “online meeting” will be held. This has consequences for the application of at least the following articles of the doctoral degree regulations: 17.1, 17.2, 18.4, 18.5.
Where reference is made to the protocol in Appendix 7, this will be the protocol as explained in an addendum to Appendix 7 as shown below. This concerns article 16.4 of the doctoral degree regulations.

Supplement to Appendix 7 due to national and international measures taken because of the Covid-19 pandemic.
At the time of the measures taken due to the COVID-19 pandemic, an amended protocol can be used. In agreement with the PhD candidate, the defence will take place via a skype or a similar online connection. The private meeting will also take place online. A digital beadle will ensure that the protocol is followed as closely as possible and see to it that the opponents are (also) able to discuss with the candidate from a distance.
The defence will be broadcast live on https://weblectures.wur.nl and will remain accessible online to the public on that web page.
In case the PhD candidate is unable or unwilling to defend the thesis online, a new date will be sought for a defence in the Auditorium.
Appendix 8 Regulations for conferring a joint, double or dual doctorate

Introduction
Wageningen University offers the opportunity to award joint doctorates. In 2010, Dutch universities were given the legal right to offer such joint doctoral degrees as described in the WHW (Higher Education and Research Act). The development of joint doctorates is made possible by the Bologna treaty and is strongly supported by the European Union. At Wageningen University, joint doctorates can only be awarded as part of a joint PhD programme that has been approved by the Academic Board of Wageningen University. The guiding principle is that the requirements of a joint doctorate programme should meet the requirements of the institutions involved in awarding the degree of Doctor.

Joint, double and dual degrees
The increase of joint doctoral programmes, within and outside the European Union, is accompanied by a proliferation in terminology used to describe the awarded degrees. Thus, PhD programmes with joint governance, joint admission and joint supervision of PhD candidates, may issue either ‘joint’, ‘double’ or ‘dual’ degrees.
For all such joint programmes, irrespective of the terminology used for the degree, the regulations in this appendix 8 apply.

Certificate
After the public defence, the candidate will receive two certificates, issued by WU and by the partner institution.
A diploma supplement will state that the degree was awarded for a single thesis resulting from a joint doctoral programme of the partner institutions.

Place of public defence
In the framework of an approved joint, double or dual degree programme, the public defence may take place either in Wageningen or at the partner institution.
If the public defence takes place in Wageningen, the partner institution may – if desired – organise later its own public defence or other ceremony.
If the public defence takes place at the partner institution and subsequently also a ceremony is desired in Wageningen, that ceremony will not be an official public defence in the Aula but a ceremony organised by the supervisors.

Procedure for a joint doctorate programme
A joint doctorate programme consists of a number of PhD projects/candidates. The proposal for the joint doctorate programme should describe the entry requirements and end terms that are applicable to all candidates in the programme. The joint doctorate programme should at least meet the conditions described in the Doctoral degree regulations of Wageningen University for the regular PhD programme.
A proposal for a joint doctorate programme has to be submitted by the graduate school of the participating chair group(s) to the Academic Board before the start of the PhD projects.
The proposal for a joint doctorate programme should include:
1. a description of the partner institutions and existing collaborations;
2. a description of the common scientific goal, framework or issue, including the number of intended PhD projects, the added value of the programme for
Wageningen University and the planned joint activities such as joint courses as part of the joint doctorate programme;
3. a description of the selection procedure for PhD projects and candidates
4. a format for the supervision and training plans;
5. a budget plan for the joint doctorate programme with special attention to arrangements governing PhD reimbursements;
6. the conditions for admission to the PhD programme, awarding the thesis and the thesis defence (location and procedure) based on the requirements set by Wageningen University at least. Within a programme, a fair distribution (a distribution reflecting the input from the institutions) of the defence ceremonies over the different locations should be pursued;
7. a proposal for the degree(s) to be conferred (joint, double or dual) and for the certificates to be issued, including supplements if applicable.

Explanation of items to be covered in application for joint doctorate programme

Description of partner institutes
Setting up a joint doctorate programme minimally requires comparable scientific quality of the partners. Large differences in quality may lead to discussions on a number of aspects concerning the joint doctorate programme, like the selection of candidates, PhD requirements, safeguarding quality, organisation of supervision, etc. Partners with equivalent quality are more likely to agree on issues related to a joint doctorate programme. In cases where substantial differences in quality between partners exist, it is important to take this into consideration when PhD projects are defined. With weaker partners, a double degree could be a better option.
When more than two partners participate in a programme, it must be clearly defined before the start of the programme whether joint degrees are established with all partners or only with selected partners.

Description of the scientific rationale
The core of the joint doctorate programme consists of a common scientific goal, framework or issue around which the PhD programme is organised. This constitutes the foundation of the programme and should therefore be clearly elaborated and agreed upon among programme partners. Participation of the graduate school or chair group (hereinafter: participant) in the programme should create added value in terms of achieving the scientific goals of the participant. Thus, the programme should fit into the strategy of the participant as well.

Selection procedure
Develop a joint selection procedure for PhD candidates that at least pays attention to proficiency in the English language, scientific quality of the candidate and the selection procedure. These criteria are comparable to the criteria Wageningen University maintains. A well-defined selection procedure of both PhD projects and PhD candidates is essential. Elements in the selection of PhD candidates are to a high degree compatible with the standards already in use at Wageningen University. As a rule, they cover English proficiency, scientific quality of the candidate and quality of the research proposal. It is important to take notice of cultural differences between partners when it comes to the selection of candidates. For example, at APT (France) the daily supervisor is not
involved in the selection of a PhD candidate, while at WU the daily supervisor
plays a key role. Identification of these issues early on might prevent discussion
during the implementation of the programme. Pay attention to cultural
differences and agree upon the way the candidates are ranked.

Supervision and training plans
The supervision and training plan format should include information on:
- the primary and secondary supervisor and the frequency of contact. All
  institutions involved in the joint PhD project should provide supervision.
- the formal time the decision is made on the continuation of the PhD project
  after 12-18 months.
- the training activities.

Budget plan
In the Netherlands, universities are paid by the government based on the number
of completed PhD theses. Considerable differences between countries exist with
respect to this. The Dutch government is also very critical towards payments for
PhD theses that were written in an international programme, such as joint
doctorate programmes. In the current situation, a Dutch university receives
payment for a PhD thesis only if the defence took place within the Netherlands. In
cases where the defence takes place outside the Netherlands, no payment from
the Dutch government is awarded. It is therefore extremely important when
planning a budget for a joint doctorate programme to take national rules
concerning PhD thesis payments into account and lay the agreements down in a
budget plan. For WU groups, it is important to clarify this: all in all, the number
of PhD defences at WU should be a fair representation of WU’s contribution to the
programme.

Conditions
The requirements regarding the quality of the PhD candidate, the thesis and the
defence should in any case meet the requirements set by Wageningen University
for the regular (non-joint) degree or doctorate.
There will be a single PhD defence for a joint doctorate. The protocol for the PhD
defence will depend on the actual location.
There will be a single evaluation procedure for a PhD thesis and for the defence
within a joint PhD programme. The title pages to be used for a joint thesis, as far
as different from the regular pages, are included below.

Procedure when PhD defence takes place at WU
When the PhD thesis defence takes place at WU the standard procedure is used.
The thesis and propositions must be approved by supervisors from both
institutions before it can be sent to the thesis committee. The thesis committee
consists of at least four members and includes at least one full professor from
WU. The composition of the thesis committee must be approved by the Academic
Board of both institutions. The supervisor at WU is responsible for seeking
approval from both institutions and will inform the secretariat for doctoral
conferrals. The conditions set in the doctoral degree regulations of WU regarding
the defence are minimum requirements. Modifications to the composition of the
examining committee to meet the requirements of the partner institution are
possible. The defence must follow the WU protocol.

Procedure when PhD defence is at a partner institution
When the PhD thesis defence takes place at a partner institution, the standard procedure of the partner institution is used. The thesis and propositions must be approved by supervisors from both institutions before it can be sent to the thesis committee. The thesis committee consists of at least four members and includes at least one full professor from WU. The composition of the thesis committee must be approved by the Academic Board of both institutions. The supervisor from WU is responsible for seeking approval from WU no later than 6 months before the defence. Modifications to the composition of the thesis committee of the partner institution might be requested to meet WU requirements. The defence will follow the protocol of the partner institution.

**Registration and output-based funding at WU**

With respect to the registration of output, Wageningen University will act according to the rules agreed upon by the Association of Universities in the Netherlands (VSNU) on publications that involve more than one organisation:
- Each joint doctorate counts as a WU PhD graduation, irrespective of where the defence has taken place.
- The joint doctorate is registered in a way that prevents double counting of PhD theses at the European level.

With respect to the registration of the PhD thesis, the category ‘Joint Doctorate’ and the place of the defence will be added to the library thesis categories. To determine whether or not a PhD graduation is eligible for output-based funding, the location of the PhD defence will be registered in PROMIS. In case of a defence at a location other than Wageningen University, the joint doctorate graduation will be considered a non-Wageningen defence from the viewpoint of output-based funding.
Required title pages for a joint PhD thesis defended at Wageningen University
If requested by the partner university, the thesis cover and/or the first title page may contain the logos of both universities.

First title page of a joint PhD thesis

The *Phytophthora infestans* avirulence gene *X5yz* and its potato counterpart *A6*

Piet A. Ardappel

(This is a fictional example)
Second title page of a joint PhD thesis
Professors with personal or special chairs must be explicitly indicated as such in the list of promotors. Their affiliation must also be listed. The list of co-promotors must state their positions and affiliations. The affiliation of WUR promotors and co-promotors consists of their basic organisational unit (chair group or business unit) plus Wageningen University & Research as main affiliation. The other members (the opponents) are listed with their main affiliation. Affiliations outside the Netherlands must also include the name of the country.

Thesis committee

Promotors
Prof. Dr F. Pietersen
Personal Chair at the Laboratory of Phytopathology
Wageningen University & Research

Prof. Dr F. Swartjes
Professor of Phytopathology
Partner Institution

Co-promotor
Dr P.A. Willis
Associate professor, Animal Nutrition Group
Wageningen University & Research

Other members
Prof. Dr W.J. Stekels, Wageningen University & Research
Dr P. de Groot, Partner Institution
Dr A. de Bruin, Keygene N.V., Wageningen
Dr P. van Oost, University of Aberdeen, UK

This research was conducted under the auspices of the Graduate School of Partner Institution, Partner Country, and the Graduate School Experimental Plant Sciences, The Netherlands, and as part of the joint PhD programme NAME.
The *Phytophthora infestans* avirulence gene X5yz and its potato counterpart A6

Piet A. Ardappel

**Thesis**

submitted in fulfilment of the requirements for the joint degree of doctor between

Partner Institution

by the authority of the Rector Magnificus, Prof. Dr Other Rector, and

Wageningen University

by the authority of the Rector Magnificus, Prof. Dr A.P.J. Mol, in the presence of the

Thesis Committee appointed by the Academic Boards of both universities to be defended in public

on Wednesday 1 February 2017 at 4 p.m. in the Aula of Wageningen University.

(This a fictional example)
Fourth title page of a joint thesis
Note that on this page ‘Wageningen University’ is used because that is the legal
entity that issues the doctorate.

Piet A. Ardappel
The Phytophthora infestans avirulence gene X5yz and its potato counterpart A6
83 pages.

Joint PhD thesis, Partner Institution, Partner Country, and Wageningen University,
Wageningen, the Netherlands (2017)
With references, with summary in English

ISBN 123-45-67890-123-4
DOI https://doi.org/10.18174/123456

(This a fictional example)

The last inside page of a joint PhD thesis is similar to Appendix 4c.
The leaflet with the propositions of a joint PhD thesis is similar to Appendix 4d.
Appendix 9  Procedure and format request ius promovendi for others than associate professors 1 in Tenure Track

**Procedure request ius promovendi for others then associate professors 1 in Tenure Track**

- The candidate prepares her/his portfolio and is personally responsible for the accuracy and completeness of the data.
- The candidate’s chair holder checks the data in the portfolio and discusses the accuracy and completeness with the candidate.
- The candidate hands in the portfolio, including the approval of the chair holder, to the Academic Board (academicboard@wur.nl).
- The secretary of the Academic Board asks for an advice from the Graduate School involved. This advice will be added to the portfolio.
- A review committee, existing of three members of the Academic board, will assess the portfolio.
- Deadlines for presenting the portfolio to the Academic Board are 15 May and 15 November.
- The Academic Board will assess the portfolio following the Tenure Track criteria for associate professor 1 for research and acquisition.

**Format portfolio ius promovendi**

<table>
<thead>
<tr>
<th>Name</th>
<th>:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current job title</td>
<td>:</td>
</tr>
<tr>
<td>Number of hours worked</td>
<td>: ... FTE</td>
</tr>
</tbody>
</table>

**Portfolio is prepared in connection with:**

**Contents of portfolio**

1. Letter of recommendation from the chair holder
2. Letter of recommendation from the Graduate School
   (The secretary of the Academic Board will ask for this letter)
3. Curriculum vitae
4. Research description
5. Research output
6. Acquisition
7. Competences

**Explanation**

*Ad 1 Letter of recommendation*
This concerns the academic level of the research and management skills of the candidate.

*Ad 2 Letter of recommendation*
This concerns the academic level of the research and PhD supervision skills of the candidate.
Ad 4 Research description
Description of the past and current research, international position, and the societal impact of the research in the field.

Ad 5 Research output
Publications
You can retrieve your publication data from the digital library (Staff Publications). If you are logged in as a WUR user and click (Go to) Staff Publications, your own publications will be shown. From the menu under My publications (right hand column) you can go to Lists, Bibliometric analysis and Research credits. Your portfolio should give the following information:
- full publication list
- total number of publications in international refereed journals (see under Research credits)
- relative impact (RI, see under Bibliometric analysis)
- percentage of highly cited papers (%T10 and %T1 in Bibliometric analysis)
- total number of citations (Web of Science and Scopus)
- h-index (Web of Science and, click here for further explanation)

PhD and postdoc supervision
- PhD candidates you have supervised as co-supervisor (co-promotor), including the years of supervision and dates of graduation
- PhD candidates you currently supervise (including the years of supervision)
- Postdocs you supervise or have supervised
- PhD supervision course

Other research output
- International cooperation/partners in research (participation in international conferences, workshops and symposia, etc.)
- Recognition of academic achievements (membership of editorial boards, scientific awards, editing/reviewing of scientific books and journals, etc.)
- Keynotes
- Reviews
- Interviews in national newspapers, on radio and TV

Ad 6 Acquisition
Information on:
- proposals written and submitted both as principal investigator and as a co-investigator
- your contribution to larger research consortia, involving non-WU institutions, that respond to calls jointly

For each of these proposals, please state:
- if they were successful or not
- at which funding agencies they were aimed
- how they support your own research agenda as described above in your vision
- how many PhD and postdoc positions they brought in and the budget (€)

Ad 7 Competences
Progress concerning the development of competences:
- What is the current development?
- What steps have been taken?
- What steps will be taken and with what aim?
