

SYMPOSIUM

29 SEPTEMBER 2022

# Automated phenotyping

IMAGEN & Breed4Food Individual Tracking symposium

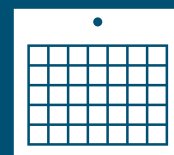

The IMAGEN and Breed4Food Individual Tracking projects together organise a symposium on **automated phenotyping**.

**National and international speakers** will discuss a range of topics, including **computer vision, sensor technologies**, dealing with **big data**, animal behaviour and welfare, and implementations in **practice**.

The symposium includes lunch and will be closed with drinks and networking.

Join us for this informative and interesting symposium!
