

The Blueyou group of companies is an international service and commercial business entity with a focus on sustainable fisheries and aquaculture. The group offers consulting services, operates fisheries and aquaculture improvement programs, and manufactures and trades sustainable seafood on a global level. Blueyou's key focus is on private sector solutions and entrepreneurial approaches to seafood sustainability, the conservation of the marine and aquatic environment as well as socially responsible and fair supply and value chains.

Blueyou Consulting Ltd. is seeking to fill a new position, with immediate start or no later than January 2023:

Scientific Fishery & Aquaculture Junior Consultant | Part-Time (40-60%)

The Position

Blueyou Consulting Ltd. was mandated to develop a robust set of exceptionally stringent environmental and social sourcing standards for a private sector food company. You will be involved in co-developing these standards in concert with our client as well as external fishery and aquaculture experts. Further, you will be the main responsible for the assessment of the client's seafood origins based on the newly developed sourcing standards. Together with the team at Blueyou's headquarters, you will develop standardized assessment methodologies and summary reports which will be made publicly available. You will also provide general scientific fishery and aquaculture support to our clients as well as the Blueyou team.

Further, you will be involved in Blueyou's *Seafood Climate Impact Program* which conducts Life-Cycle-Assessments (LCA) of seafood origins with exceptional data granularity. You will be involved in primary data acquisition from fishery and aquaculture operations, further developing the existing data questionnaires and preparation of the data for later analysis.

This position offers the benefit of full flexibility of your work location. Except for a few in-person meetings per year, for which you would need to travel to our headquarters in Zurich, Switzerland, the tasks are designed to be completely desk-based and can be done from your home office. Working hours are flexible, with the exception of certain defined times/days and occasional online meetings. Deadlines need to be strictly met.

Your Profile

You are an intrinsically motivated, highly independent and well-organized person with a passion for technical details, producing excellent quality deliverables on a publishable level. You have an MSc degree or higher in fisheries, aquaculture or marine science, or similar, a thorough understanding of the well-known fishery and aquaculture standards such as MSC, ASC or Organic Standards as well as a very good understanding of fishery and aquaculture operations and management. An excellent level in English (written and oral) is a must, German is a plus but not strictly required. Very good knowledge of MS Office is required. A dedicated work style, willingness to acquire detailed knowledge on specific fishery/aquaculture topics as well as the capability of working independently is crucial for this position.

Depending on your experience and employment status the salary range is 1300-2200 EUR gross per month.

If you are interested in pursuing this opportunity, we would be delighted to hear from you. Please send your resume and cover letter by e-mail to Jonas Walker, jonas.walker@blueyou.com, no later than the 20th of November 2022.
