How to log in git.wur.nl with two-factor authentication
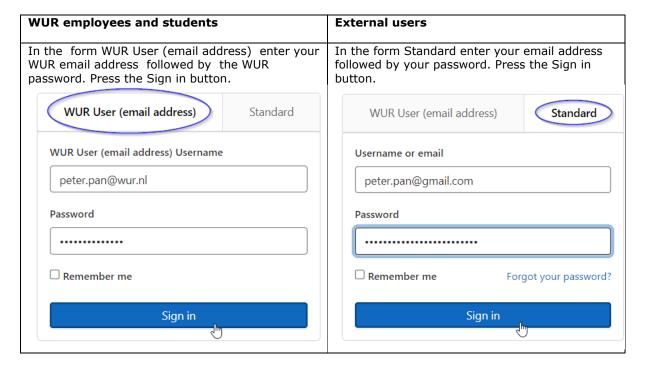

Instructions
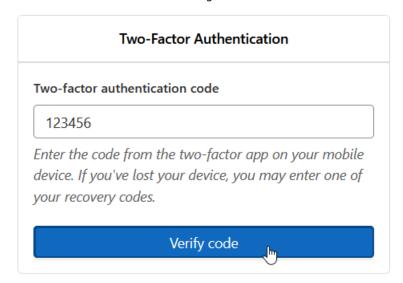

Step 1. Login

In your browser enter the url [git.wur.nl](git.wur.nl). You will be redirected to the login page.

WUR employees and students	External users
In the form WUR User (email address) enter your WUR email address followed by the WUR password. Press the Sign in button.	In the form Standard enter your email address followed by your password. Press the Sign in button.

Step 2. Enter the two-factor authentication code

After pressing the Sign in button you will be presented with a second form called **Two-Factor Authentication**. You have to enter the code from a two-factor authentication app on your mobile device like Microsoft Authenticator or Google Authenticator.

- Open a two-factor authentication app like Microsoft Authenticator or Google Authenticator
- Select the git.wur.nl WUR account
- The one-time password code will be presented for a limited time
- Enter this code as value for the field Two-factor authentication code in the browser
- Press the button Verify code
- You will be redirected to the default webpage
