

Beyond traditional resource management

A seminar on the occasion of the retirement of Paul van Zwieten

On **8 April 2022** the Aquaculture and Fisheries Group of Wageningen University organises a seminar on fisheries management that explores strategies going beyond traditional stock management.

Prof. **Jeppe Kolding** of the University of Bergen will discuss the ins and outs of the concept of balanced harvesting. Prof. **Jan Geert Hiddink** of Bangor University will address the ecosystem effects of bottom trawling. Prof. **Jaap van der Meer** will explore the possibilities and limitations of marine food production. Finally, Prof. **Simon Bush** will discuss governance arrangements for global sustainable seafood.

Preliminary programme:

9:00	Welcome
9:30 – 12:00	Lectures, part 1
12:00 – 13:00	Lunch
13:00 – 15:00	Lectures, part 2
15:00 – 15:15	Concluding remarks
15:00 – 17:00	Drinks

Venue: [Boerderij Hoekelum](#), Bennekom

Please visit [our website](#) to register for the seminar and/or the drinks.

The seminar will include a (vegetarian) lunch and will be followed by an informal get-together with drinks.
