

In this course, we go onsite on a dairy farm where many recommended carbon sequestration practices are implemented. We talk to soil scientists, farmers, legislators, carbon certifiers. Using an immersive approach, we seek to see, to witness, experience, and truly understand: what is carbon farming?

Course topics

- Soils in the global carbon cycle
- Monitoring soil carbon: theories and methods
- Soil carbon and sustainability: trade-offs and synergies
- Soil carbon and European policies

Lecturers, farmers and invited speakers

Gabriel Moinet Soil Biology group WUR

Alix Vidal Soil Biology group WUR

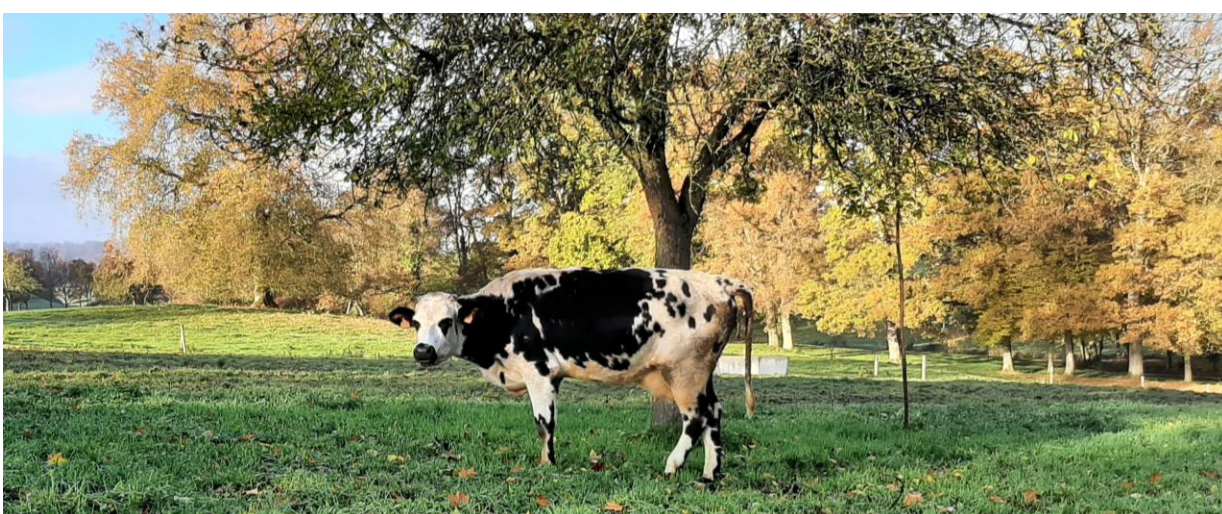

Ina Möller Environmental Policy group WUR

Claire Chenu French National Research Institute for Agriculture, Food and Environment

Roman Hüppi, myclimate NGO

Laurent & Matthias Moinet, La ferme de Hyaumet

Gilles Collombet-Gourdon, Domaine de Merval

Date:

14-20 September
2024

Location:

On site on a farm in
Dampierre-en-Bray,
France
