Masterclass Food & Agri Principles for Financials

Explore the link between investments
and a Sustainable & Resilient Food System

Agricultural systems face accumulating economic, ecological and social challenges, raising concerns about their sustainability and resilience. In this context profitability of Food & Agri investments is not only influenced by expected business risk and performance, but also by the wider implications for system sustainability and resilience.

Join us on 9 & 10 May

On Tuesday May 9 and Wednesday May 10 we host the 2-day Masterclass on the Wageningen Campus. Participating gives you inspiration and first in-depth insights on the impact of your investment approach. During the programme we will work with real-life cases. You will be able to see the bigger picture and ask the right questions.

Would you like to learn more about the programme? Please contact Programme Manager Miel Hooijdonk miel.hooijdonk@wur.nl

Many investors (46%) assess their **knowledge** and understanding of biodiversity as **being limited**.
