
Manual for installing and configuring MyWorkspace

iPhone en iPad

You can also access My Workspace using your iPhone or iPad. Here, you can access the same files on your network drive (among others) as you normally would when you are logged in to a computer at Wageningen University & Research.

To use MyWorkspace, you will need to install the VMware Horizon Client. This manual explains how you can install the VMware Horizon Client and launch MyWorkspace from an iPhone or iPad.

For more information, see: www.intranet.wur.nl/myworkspace

Quick Start

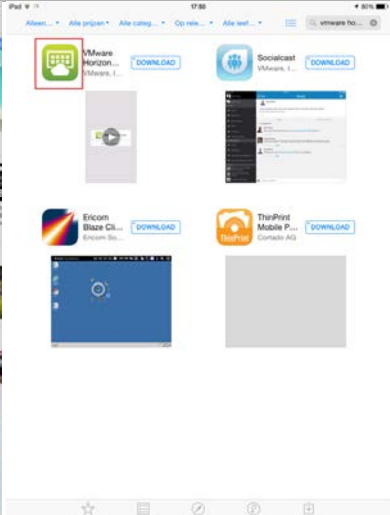

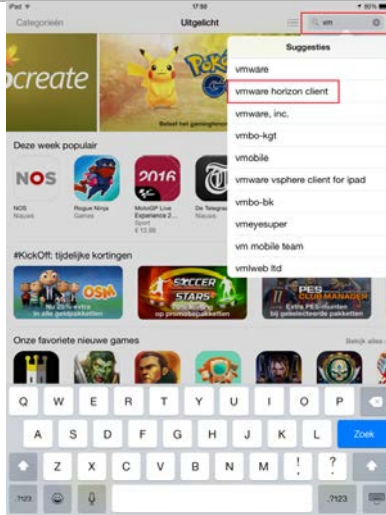

Step 1 Step 2 Step 3

Open the App Store

Type "vmware" in the search bar.

Select "VMware Horizon Client".

Please note: the icon now looks different than what in this manual, specifically as:

Step 4 Step 5 Step 6

Click "Download".

Click "Install".

After it installs, select "Open".

Step 7

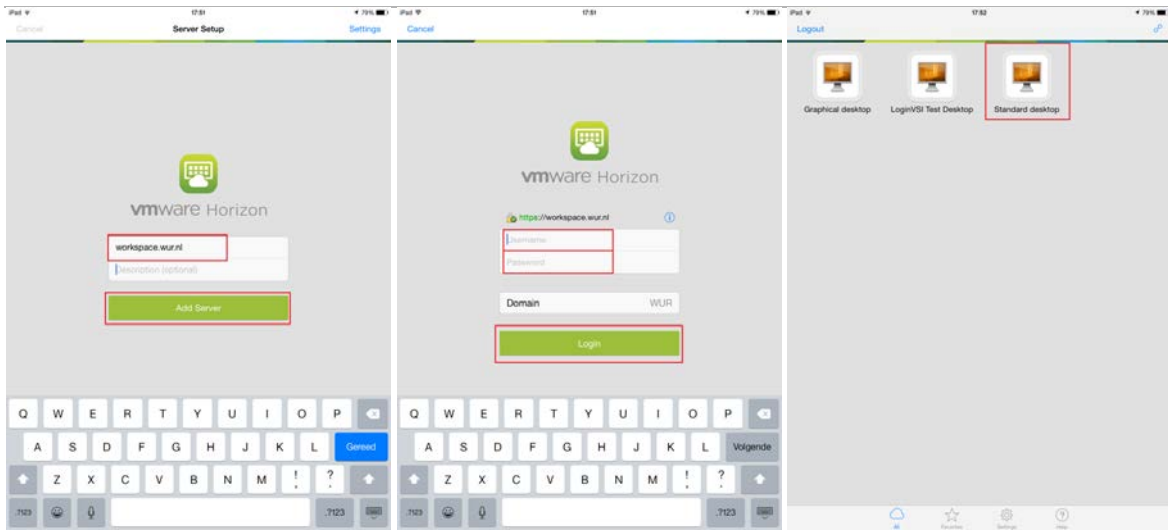

For the servername, fill in: **workspace.wur.nl**. For "Description", you may fill in an additional description. Then select "Add Server".

Step 8

Please enter your username and password for your WUR-account. Then click "Login".

Step 9

Choose the desktop you wish to use.

Step 10

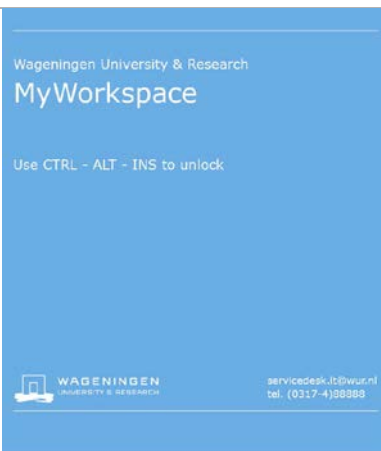

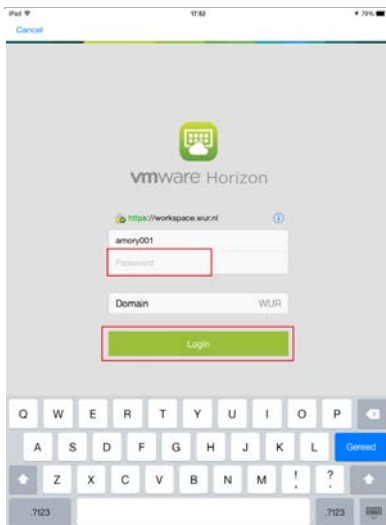

Enter your WUR account password again. Then click "Login".

Step 11

My Workspace will now launch.

Step 12

To launch My Workspace next time: click on the VMware Horizon Client app.

Choose the desktop you wish to use and log in with your WUR account.
