

Application form professionalization subsidy

SWU Thymos wants to stimulate ssa's to professionalize themselves and their associations.

Therefore, certain levels are set up with requirements, which are awarded with a subsidy after completion.

All requirements per level must be met in order to receive the subsidy for that level. A higher level can be completed if the previous level is also completed. The box 'Fulfilled' can be answered with yes or no. The box 'proof' requires a relevant confirmation of the requirement. For example, proof can be a link to a page on the website, a screenshot or link of a required document or photo of a training with another ssa. Proof can be inserted as text, via a memo or separately (underneath the table) if it requires more space.

The deadline for sending in this application form is **December 1st**. The application will then be assessed by the Board of SWU Thymos. A new application form must be submitted **every year**.

If there are questions or difficulties with meeting certain requirements, SWU Thymos can be contacted (SWU.Thymos@WUR.nl). If the Board concludes that a certain requirement is impossible or irrelevant for an SSA, the Board can decide to give an exemption for a requirement.

The application will only be assessed if this form has been completed in full.

		Organise a constitution drink (cobo)		
		Exchange a training , workshop or organise an event with another ssa		
Sustainability		Sustainability is a core theme within your ssa. This can be proven by concrete examples		

* The 'Board of Advice' (CvA) is a department that can give (unwanted) advice to the board. The 'financial control committee' (KCC) controls the bookkeeping of the treasurer. This is very important to be able to remain transparent about the finances. These two committees are also required by a new law, see the Act on the Management and Supervision of Legal Entities (NL: WBTR).
