

Grading table Bachelor Molecular Life Sciences (BML) Transcript of records academic year 2024-2025:

The grading table requires universities to keep track of their grading practice and culture, which is good practice in many institutions across Europe. The ECTS grading table allows for simple, transparent interpretation and conversion of grades from one system or context to another, and therefore does justice to the level of academic performance of all learners. Used correctly, it bridges different grading systems as well as different cultures in the European Higher Education Area and beyond. The grading table gives the distribution of grades for this specific study period. It presents how many students (in percentages) receive a specific grade. This provides all necessary information to convert the grade in any local grading system.

National/Wageningen University Grade	#Number awarded in reference group	grading %*	cumulative % of the grades
10	135	02	02
9.5	295	04	05
9	645	08	13
8.5	1036	12	25
8	1452	17	42
7.5	1391	16	58
7	1380	16	75
6.5	976	12	86
6	1170	14	100
TOTAAL	8480	100	

* Based on the grades of the last 3 academic years.
