WAGENINGEN
UNIVERSITY & RESEARCH

Student Career Services of Wageningen University & Research

The matchmaker between employers and students

Student Career Services supports students and recent graduates through their transition from study to career. Here, students receive career advice and coaching and learn to explore the labour market. Organisations find us and share their latest job vacancies, internships and other career opportunities. We serve the whole student population of Wageningen – about 12,000 students, as well as our recent graduates. Student Career Services is part of the corporate staff of Wageningen University & Research. Our offices are located in the educational building Forum, Wageningen Campus.

Student Career Services offers you the chance to boost your Employer Brand even further. We offer a variety of chances for exposure to our students and recent graduates. With the Partnership Packages, there are different options to choose from. You can choose a Basic Partnership Package or a Premium Package, both with fixed fees. Alternatively, you can make a tailor-made Package, where you can choose your preferred activities. The fee for this Package is calculated based on which activities you select.

If you are interested in a Partnership Package and you share our values and ambitions, please contact us and we will discuss what best meets your criteria.

Point of contact Student Career Services: Astrid van Noordenburg – Manager Student Career Services.

More options to collaborate with Wageningen University & Research

Real-life learning experiences for students

- » Guest lectures: via endorsement lecturers, if it fits within the objectives and context of the relevant educational element.
- » Student Consultancy Projects: connecting your organisation's real-life assignments with the education of the University. For example, we host the Academic Consultancy Training course, where a group of Master's students explore real-life cases as young consultants in a learning environment.
- » Student Challenges: student teams work on an innovative idea and organisations are asked to coach and sponsor them.
- » Hackathons: young talents work on targeted challenges, side by side with organisation representatives.

Professional education

To tackle the major global challenges our society is facing, Wageningen University & Research educates professionals around the world by offering high quality knowledge on healthy food and the living environment. WUR focuses on 'lifelong learning' educational ecosystems, ranging from MBAs and postgraduate study programmes to summer schools, online courses and MOOCs. We also offer tailor-made and in-company training for professionals. Wageningen Centre for Development Innovation as well as Wageningen Academy can organize these for you.

We facilitate contact with

- » Our campus managers, for activities on campus, sharing research facilities and campus orientation.
- » Relevant study- and student associations.
- » Our research experts and contact persons for chair groups and research institutes.
- » Our alumni.
- » StartLife: growing Food & Agtech start-ups into leading enterprises.
- » FabLab: from drawing and editing 3D models to helping with laser cutting work and 3D printing jobs.
- » Expat Center Food Valley specialises in immigration services for your highly skilled, international, future employees.

If you are interested in any of these additional services, or if you want to contact other stakeholders here at WUR, we can be your point of contact as well.
