

# The Collaborative Framework for Food Systems Transformation

An illustration of food systems elements, drivers, activities and outcomes (adapted from CIAT)

Sustainable  
Food Systems

# Key actions for incorporating food systems approach:

## Be/identify a food systems champions

- Advocate for a food systems approach
- Raise awareness and train food systems actors

## holistic assessment of the food system

- Prepare a diagnosis, based on food systems lenses
- Gather data, review policies and institutions mandates

## Create a multi-stakeholder platform for action

- Create a joint vision about envisaged sustainable food system
- Create an Action Plan to achieve Sustainable Food Systems (targets, KPIS, responsibilities, etc)

## Strengthen institutional capacity

- Empower public institutions;
- Create mandated mechanisms (eg. inter-ministerial committees);
- Continually review and monitor policies
