

Setting up wireless on Linux

Introduction

This instruction will give you some information how to connect your own computer to the Wireless network of Wageningen UR. These instructions will explain how to do that.

Requirements

- A WURnet-account. This is your employee or student account with associated password.
- Make sure your wireless network card is enabled.

Guide

- Open the wireless networks list in the top-right corner of the screen and choose **wur-user** from the list of available networks.
- Under the *Security* drop down menu choose *WPA & WPA2 enterprise*
- Under the *Authentication* drop down menu Choose *Protected EAP (PEAP)*.
- In the *Username* section type your Wageningen UR email adres (**firstname.lastname@wur.nl**).
- In *Password* section type the corresponding password.
- Click *Connect*.
