

The Malnutrition Puzzle: embedding nutrition in a post-2015 research framework

Programme

Welcome by Dr. Inge Brouwer, Wageningen University

Three 5-minute pitches by PhD students of Wageningen University:

- Elise F. Talsma, Netherlands, Human Nutrition
- Godfrey Taulya, Uganda, Plant Production Systems
- Prossy Ntakyo, Uganda, Development Economics

Prof. Lawrence Haddad, IDS, Sussex (UK)

'An enabling environment for agriculture to affect nutrition: What would it take?'

Participation in this event is free of charge. The Dr. Judith Zwartz Foundation enables the Division of Human Nutrition to organise each year a public lecture and a science lecture. This first science lecture has as focus one of the Division's common research themes; 'international nutrition'.

10 October 2013. Orion building, Wageningen Campus. Start 16.00 hrs.

Get together from 15.30 hrs, drinks afterwards. Questions: human.nutrition@wur.nl

WAGENINGEN UNIVERSITY
WAGENINGEN UR

Division of Human Nutrition

This initiative

The Dr. Judith Zwartz Foundation offers the Division of Human Nutrition of Wageningen University the possibility to organise on an annual basis a science lecture related to a subject of relevance for the research agenda of the Division. Next to a science lecture also an annual public lecture is organised. Dr. Zwartz was one of the first staff members of the former Department of Human Nutrition of the Agricultural University (now Wageningen University).

This lecture

The attention for nutrition issues in international development received a boost after the publication of the so-called Lancet series in 2008 followed by a 'second edition' in June 2013. These series highlight evidence gaps which may have to lead to new ways of framing nutrition, new partnerships and new ways of training.

Lawrence Haddad will reflect on these in support of guiding the embedding of nutrition in the post-2015 research framework. Lawrence Haddad is the Director of the Institute of Development Studies, Sussex. He is an economist and his main research interests are at the intersection of poverty, food insecurity and malnutrition (Philippines, India, South Africa). He was formerly Director of the International Food Policy Research Institute's Food Consumption and Nutrition Division (IFPRI). He has a PhD from Stanford University.
