

SEMINAR: What do recent developments in Recirculating Aquaculture System (RAS) mean for the future?

DATE: 8 MAY 2019

LOCATION: WAGENINGEN UNIVERSITY, THE NETHERLANDS

FREE

SEMINAR CONTENT

The seminar is organised with NGvA (the Dutch association for aquaculture) and Aquarius (aquaculture student organisation). This seminar will include discussions on the state and future of RAS in the world and the Netherlands, the requirements of Atlantic salmon smolts and post smolts in RAS, Yellowtail Kingfish and off flavour and RAS in practice. It will also present an opportunity to network and discuss RAS developments with RAS-course participants, students, members of NGvA and experts from research and industry.

ORGANISERS

Aquaculture and Fisheries Group, Wageningen University (the Netherlands), NGvA (the Dutch association for aquaculture) and Aquarius (aquaculture student organisation)

AQUARIUS & COMPANIES

Student association Aquarius would like to ask your attention for the following: there will also be a company day organised on the 8th of May in Wageningen, next to the RAS seminar. There will be presentations given in room C0221 (next to the one for the seminar) by various companies from different sectors, like aquatic ecology, fisheries and governance. These companies will, in addition with interested aquaculture companies, present themselves on the hallway to all students, NGvA members and others that are interested. This is the perfect opportunity for companies to attract new talent, and discuss thesis, internship and job possibilities. Is your company interested in joining this market? If so, please contact us on the following email address: veetelers.aquarius@wur.nl. **A final remark!** It is possible for aquaculture (related) companies to join both the seminar and the company day, as the programs are interlinked.

PROGRAMME

- **15:00** Opening: G. Wiegertjes (WUR), Chair: J. Verreth (WUR)
- **15:30 – 16:15** Requirement of Atlantic salmon smolts and postsmolt in RAS, V Mota (Nofima)
