EU policy for agriculture, food and rural areas
edited by: Arie Oskam, Gerrit Meester and Huib Silvis

The European Union varies widely within its boundaries. Still, there are common policies for agriculture, food and rural areas, although with many differences in relation to specific conditions in Member States. Starting with the Mac Sharry reform in 1992, the EU is on a long-term path to freer and more open markets. Traditional EU market and price measures are now largely replaced by ‘decoupled’ direct income support, and further steps are being prepared. There is increased attention at both EU and Member-State levels to food quality, food safety and animal welfare, as there is also to the environment and the development of rural areas. The Union is thus becoming a leader in food and rural policies.

Many experts have contributed their up-to-date knowledge to this book. It is suitable for scientific and professional education at bachelor level, and as a supporting text in master level courses. Business executives, officials and non-governmental organisations will also find this book to be of interest.

Second, completely revised edition.

• 'I am sure that it will give huge insight in the complex Common Agricultural Policy'
  (Mariann Fischer-Boel at Brussels, 27 January 2010)

• 'It might be argued that there is no need for another book on the CAP (...). But this book is rather different, and it certainly fills a gap in the literature.'
  (Wilfred Legg, Eurochoices 9(2))

• 'This is a particularly innovative approach in phase with the way agricultural economics should now be taught.'
  (Jean-Christoph Bureau, ERAE 37(4))

• 'Readers will be pleased by the broad perspective of this book, which covers many interesting EU policy areas.'
  (Mariann Fischer-Boel (Preface) and David Blandford, JAE 62(1))
**Table of contents**

**Part I. Introduction**  
Introduction and outline  
1. European integration and its relevance for agriculture, food and rural areas

**Part II. Institutional framework**  
2. EU institutions and decision-making processes  
3. The EU budget  
4. The WTO context  
4A. European standards in trade and development  
5. Developing countries and EU agricultural and food policy  
6. Public and private roles in agri-food and rural policy-making

**Part III. Agriculture**  
7. Agriculture and the food chain  
8. Market, price and quota policy: from price support to safety net  
8A. Private market and price stabilisation methods  
9. Direct income support and cross-compliance  
10. Agricultural multifunctionality and Europe’s new land debate  
11. Animal health policy  
12. Plant health policy  

**Part IV. Food**  
14. Consumers and EU agricultural and food policies  
15. The General Food Law and EU food legislation  
16. Food quality, food safety and certification  
17. The New Food Economy

**Part V. Rural areas**  
18. Economic dynamics in rural regions  
19. The demand side of rural amenity: definition and valuation methods  
20. Rural areas and the environment  
21. Nature preservation and production  
21A. Collective approaches to agri-environmental management  
21B. Green services  
22. Balancing between structural and rural policy

**Part VI. Future**  
23. Present and future EU GMO policy  
24. Future developments and policies
