

# Erase iPad settings

There are three ways to Wipe your iPad:

1. The Service desk can wipe your iPad remotely when you have configured your WUR mail
2. You can wipe your iPad via the iCloud web page with your Apple ID
3. The iPad can be wiped on the iPad self.

The last option is described in this document.

- Go to the home screen of the iPad
- Tap on *Settings*

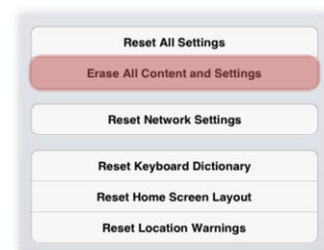

- Drag the column on the right up

- Tap on *Reset*

- Tap on *Erase All Content and Settings*

- Tap on *Erase* if want to erase the iPad

- Tap again on *Erase* if you are really sure you want to erase all media, data, and settings from the iPad.

When the Erase button has been tapped the iPad will be wiped and after this will restart.
