

iPad configuration in iTunes

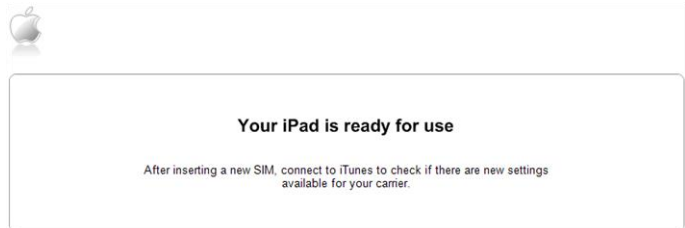

When iTunes, possibly in combination with the iPad, has been used before on the computer it is possible that the screens in the first part of this manual won't be shown!!!

If needed start iTunes.

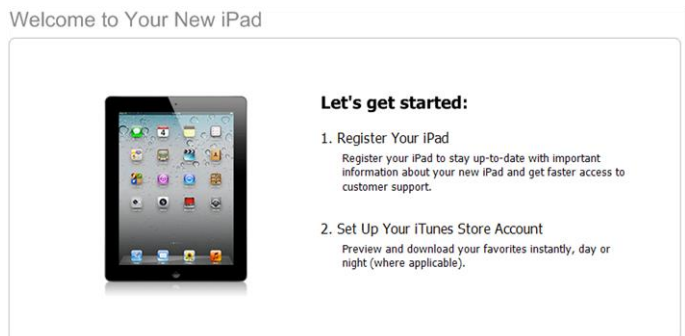

If needed power on the IPAD and connect it to the computer.

Check if your iPad is visible under *Devices*, select the *iPad* if it is not selected, and check if one of the following screens is shown in iTunes:

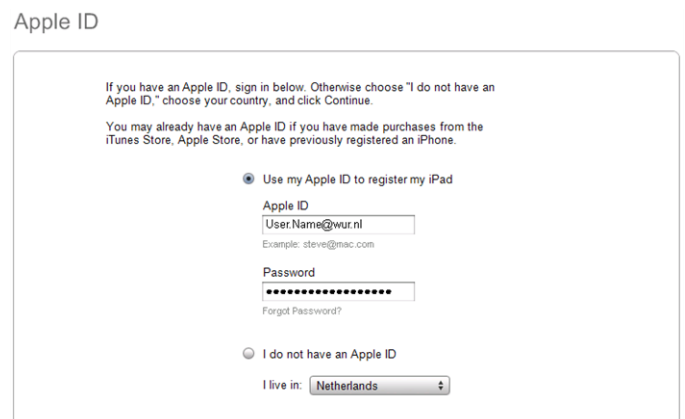

- Click on *Continue*

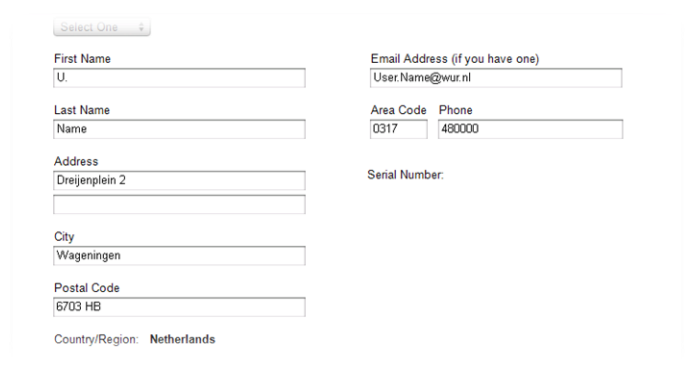

- Click on *Continue*

- Enter your **Apple ID and password**
- click on *Continue*

- Enter your name and other information
- Click on *Submit*.

- Select the option *'Set up as new iPad'*
- Click on *Continue*

- When the iPad has a silver WUR-sticker with a barcode you must enter the number with the character 'M' in front of it as the *Name* for the iPad.

- De-select (remove check mark) the options *'automatically sync songs to my iPad'*
- De-select *'Automatically add photos to my iPad'*
- Click on *Done*.

- The iPad configuration in iTunes is finished when the first device backup is created.

Continue with the next step.
