

PUBLICATIONS 1980 - 1987:

- Jackson J.F., B.M.L. Verburg-van Kemenade, H.F. Linskens (1980) On the inability of *Agrobacterium tumefaciens* Ti-plasmid to transform pollen cells of *Petunia hybrida*. *Acta Botanica Neerl.* 4-5: 277-283.
- Verburg-van Kemenade B.M.L., P.H.G.M. Willems, B.G. Jenks and A.P.van Overbeeke (1984) The development of the pars intermedia and its role in the regulation of dermal melanophores in the larvae of the amphibian *Xenopus laevis*. *Gen. Comp. Endocrinol.* 55: 54-65.
- Verburg-van Kemenade B.M.L., M. Tappaz, L Paut and B.G. Jenks (1986) GABAergic regulation of melanocyte-stimulating hormone secretion from the pars intermedia of *Xenopus laevis*: immunocytochemical and physiological evidence. *Endocrinology* 118: 260-267.
- Jenks B.G., B.M.L. Verburg-van Kemenade, M.C. Tonon and H. Vaudry (1985) Strategies in the regulation of secretory signals from pro-opiomelanocortin-producing cells. In: *Neuroendocrine Molecular Biology*. Eds. G. Fink, A.J. Harmar, K.W. McKerns. Plenum Press, New York-London. p 281-294.
- Vaudry H., B.G. Jenks, B.M.L. Verburg-van Kemenade and M.C. Tonon (1986) Effects of tunicamycin on biosynthesis, processing and release of pro-opiomelanocortin-derived peptides in the intermediate lobe of the frog *Rana ridibunda*. *Peptides* 7:163-170.
- Verburg-van Kemenade B.M.L., B.G. Jenks and A.P. van Overbeeke (1986) Regulation of melanotropin release from the pars intermedia of the amphibian *Xenopus laevis*: evaluation of the involvement of serotonergic, cholinergic, or adrenergic receptor mechanisms. *Gen. Comp. Endocrinol.* 63:471-481.
- Verburg-van Kemenade B.M.L., B.G. Jenks and A.G.J. Driessen (1986) GABA and dopamine act directly on melanotropes of *Xenopus* to inhibit MSH secretion. *Brain Res. Bull.* 17: 697-704.
- Verburg-van Kemenade B.M.L., M.C. Tonon, B.G. Jenks and H. Vaudry (1986) Characteristics of receptors for dopamine in the pars intermedia of the amphibian *Xenopus laevis*. *Neuroendocrinology* 44: 446-456.
- Verburg-van Kemenade B.M.L., B.G. Jenks and A.J.H.M. Houben (1986) Regulation of cyclic-AMP synthesis in the amphibian melanotrope cells through catecholamine and GABA receptors. *Life Sci.* 40: 1859-1867.
- Verburg-van Kemenade B.M.L., B.G. Jenks, F.J.A. Lenssen and H. Vaudry (1987) Characterization of GABA receptors in the neurointermediate lobe of the amphibian *Xenopus laevis*. *Endocrinology* 120. 62-68.
- Verburg-van Kemenade B.M.L., B.G. Jenks, J-M. Danger, H Vaudry, G Pelletier, S. Saint-Pierre (1987) A NPY-like peptide may function as MSH-release inhibiting factor in *Xenopus laevis*. *Peptides* 8: 61-67.
- Verburg-van Kemenade B.M.L., B.G. Jenks, Th.J. Visser, M.C. Tonon and H. Vaudry (1987) Assessment of TRH as a potential MSH-release stimulating factor in *Xenopus laevis*. *Peptides* 8: 69-76.
- Jenks B.G., B.M.L. Verburg-van Kemenade and G.J.M. Martens (1987) Proopiomelanocortin in the amphibian pars intermedia: a neuroendocrine model system. In: *The melanotropic peptides: volume 1*, Ed. Mac E. Hadley. CRC Press. p 103-126.
- Tonon M.C., J.M. Danger, M. Lamacz, P Leroux, S Adjeroud, A.C. Andersen, L. Verburg-van Kemenade, B.G. Jenks, G. Pelletier, L Stoeckel, A Burlet, G. Kupryszewski and H. Vaudry (1987) Multihormonal control of melanotropin secretion in cold blooded vertebrates. In: *The Melanotropic Peptides: volume 1*, Ed. Mac E. Hadley. CRC Press. p 127-170.
- Jenks B.G., and B.M.L. Verburg-van Kemenade (1987) Neuroendocrine integration in the pars intermedia of the pituitary gland of the amphibian *Xenopus laevis*. *Proceedings of the Serbian Academy of Science*. Ed. V. Pantic. Bulletin 29, 37-55.
- Verburg-van Kemenade B.M.L., B.G. Jenks, R.J.M. Smits (1987) N-terminal acetylation of MSH in the pars intermedia of *Xenopus laevis* is a physiologically regulated process. *Neuroendocrinology* 46: 289-296.
- Verburg-van Kemenade B.M.L., B.G. Jenks, P.M.J.M. Cuijsen, A. Dings, M.C. Tonon and H. Vaudry (1987)

Regulation of MSH release from the neurointermediate lobe of *Xenopus laevis* by CRF-like peptides. Peptides 8: 1093-1100.

ABSTRACTS 1980 - 1987:

Verburg-van Kemenade B.M.L., P.M.G.M. Willems, B.G. Jenks and A.P. van Overbeeke. Development of the pars intermedia and its role in the regulation of dermal melanophores of the amphibian *Xenopus laevis*. XIV Acta Endocrinologica Congress. Stockholm, Sweden. June 27-30, 1983.

Martens, G.J.M., M.C. Tonon, B.M.L. Verburg-van Kemenade, B.G. Jenks and H. Vaudry. A comparison of biosynthesis, processing and release of the pro-opiomelanocortin related peptides in two species of amphibians. XIIIth Conference of European Comparative Endocrinologists. Sheffield, England. July 31 - August 5, 1983.

Verburg-van Kemenade B.M.L., B.G. Jenks, M.C. Tonon, H. Vaudry and A.P. van Overbeeke. Control of MSH release from the pars intermedia of the amphibian *Xenopus laevis*: a microsuperfusion study. 7th International Congress of Endocrinology. Quebec City, Canada. July 1-7, 1984.

Vaudry H., B.G. Jenks, M.C. Tonon and B.M.L. Verburg-van Kemenade. Biosynthesis and processing of pro-opiomelanocortin-related peptides in the intermediate lobe of the frog pituitary. Evidence that dopamine controls both maturation and release of the peptides. Regulatory Peptides: Mode of action on digestive, nervous and endocrine systems. Paris, France. May 9-11, 1985.

Verburg-van Kemenade B.M.L., and B.G. Jenks. Regulation of hormone secretion from the pars intermedia of the amphibian pituitary gland. 13th International Congress of Biochemistry. Amsterdam, The Netherlands. August 25-30, 1985.

Jenks B.G., B.M.L. Verburg-van Kemenade, R.J.M. Smits and H. Vaudry. Regulation of N-terminal acetylation of MSH in amphibians. 13th International Congress of Biochemistry. Amsterdam, The Netherlands. August 25-30, 1985.

Jenks B.G., B.M.L. Verburg-van Kemenade and H. Vaudry. Regulation of N-terminal acetylation of MSH during background adaptation in the amphibian *Xenopus laevis*. 13th Annual meeting of the International Foundation for Biochemical Endocrinology. International symposium on neuroendocrine molecular biology. Edinburgh, Scotland. Sept. 16-20, 1985.

Vaudry H., B.G. Jenks, M.C. Tonon and B.M.L. Verburg-van Kemenade. Biosynthesis and post-translational processing of pro-opiomelanocortin in the frog pars intermedia. 13th Annual meeting of the International Foundation for Biochemical Endocrinology. International symposium on neuroendocrine molecular biology. Edinburgh, Scotland. Sept. 16-20, 1985.
