Using SCIENCE to address the WORLD's PROBLEMS

Farms and farmers in Africa and Latin America

- ✓ **N2Africa:** How to increase inputs from biological N fixation in smallholder farms in **Africa**
ken.giller@wur.nl
- ✓ Working with farmers in **Latin America** to analyse their systems and design sustainable futures
ken.giller@wur.nl
maja.slingerland@wur.nl

Competing claims on natural resources

- ✓ **Competing claims** on natural resources: . agriculture or nature parks and forests in **Africa** and **Latin America**
www.competingclaims.nl
ken.giller@wur.nl
maja.slingerland@wur.nl

Global food security

- ✓ Yield gap atlas
martin.vanittersum@wur.nl
- ✓ Effects of Phosphorus limitations on global food production
sheida.sattari@wur.nl

Sustainable agriculture in Europe

- ✓ System for Environmental and Agricultural Modelling; Linking **European** Science and Society to study future agricultural policies
www.seamlessassociation.org
martin.vanittersum@wur.nl

Biofuels

- ✓ Do African farmers benefit from bio-energy crops?
gerrie.vandeven@wur.nl
- ✓ **The biofuel debate:** trade-offs between food, fuel, feed, fibre, forest,
madeleine.florin@wur.nl
- ✓ Sustainable bio-energy crops in Europe
sanderc.devries@wur.nl

Climate change

- ✓ Climate change and adaptation in agriculture
pytrik.reidsma@wur.nl
martin.vanittersum@wur.nl
